PREFACE

The present issue of the Statistical Abstract of the Indian Union (New Series No. 15) incorporates the latest available data under the important heads of economic and social development. Generally, in addition to national aggregates for a period of five to ten years, information in respect of individual States and Union Territories is given for the latest available year. With effect from 1-11-1966 the former State of Punjab was re-organised into the states of Haryana, Punjab and the Union Territories of Himachal Pradesh and Chandigarh. Data in respect of these States and Union Territories according to the re-organised set up are not available for many Tables. In such cases data relate to pre-reorganised States of Punjab and Himachal Pradesh. Every year the Abstract introduces new material and eliminates relatively less useful data. The alterations made have been listed in tabular statements on pages (viii) and (ix).

2. The publication would serve not only as a convenient source of reference but also as a key to other statistical publications of Central Government agencies. The primary sources are indicated at the foot of each table the relevant publications of the Departments mentioned will furnish more detailed information. The various sections of the Abstract are preceded by brief explanatory notes which are intended to be read in conjunction with

the tables.

3. The continuing cooperation and suggestions for the improvement of the Abstract received from the various Ministries of the Government of India, the State Governments and the public, are acknowledged with gratitude.

4. Figures have been presented throughout in metric units of weights und measures. The co efficients used for conversion of old units into metric units are given below:—

One maund			. 37·324 kgs.
One tola .			. 11.664 grams
One ton .			i · 016047 tonnes
One cwt			. 50.802345 kgs.
One lb			. 0.453592 kg.
One ounce			. 28.349520 grams
One yard.	,	,	. 0.9144 metre
One acre .			. 0.404686 hectare
One sq. mile			. 2.589988 sq. kilometres.

For conversion of temperature in degree °Fahrenheit (F) to °Centigrade (C) the relation is C=5/9 (F-32).

5. Some of the units of measurement used are:
One lakh—100,000 (one hundred thousand).
One crore—10,000,000 (ten million).

6. The following symbols have been used throughout the Abstract:

.. Not available.

-Nil or negligible.

Central Statistical Organisation, Department of Statistics, Cabin Secretariat, Govt. of India.

Dated, New Delhi, the 31st March, 1968.

C. Statement showing the changes effected in the sections/tables in the current issue (1967) as compared with the previous issue (1966)

S.	No.	Table number in the current issue (1967)	Table number in the previous issue (1966)	Changes effected
	1	_	_	Heading of the section 'National Income', has been changed' to 'National Products'.
	2	165	13	The table has been compiled on the basis of the revised estimates and its heading has been changed to the present form.
	3	166	14	In this table net domestic products at 1960-61 prices have been given. The table has been amplified togive detailed information on the subject and presented under a changed 'heading'.
	4	71	60 & 61	The tables on 'Life Insurance Fund' & 'Endowment Assurance Fund' shown separately under the heading. 'Post Office Insurance Fund Account', have been recast into one to show consolidated data for whole life and endowment postal insurance, for the years 1964-65 & 1965-66.
	5	72	62	Information relating to 'Life Insurance Policies' 'Endowment assurance policies' has been amalgamated and presented in a consolidated form, for the years 1964-65 and 1965-66.
	6	54	79	Information relating to 'number of societies' and their membership (credit and non-credit) only, has been given in this table. Other information on 'share capital' etc. has been omitted.
	7	142-B	173-B	This table has been amplified by introducing new information on 'East Pakistan migrants'.
	8	236	App. 7	Information on 'Principal targets and achievements' which was hitherto shown in the 'Appendix' is now given under a separate section 'Five Year Plans'.

This is an abstract of the available data concerning the area and population of the Indian Union based on the Census of Population of 1961.

TABLE I

This table contains data on area, total population and its classification according to sex and urban and rural population. The area figures shown in this table refer to the areas of the Indian Union and its constituents as on 1-1-1966. According to the Punjab Reorganisation Act 1966, the State of Punjab was reorganised into the States of Haryana and Punjab and the Union Territories of Chandigarh & Himachal Pradesh. The areas of these States and Union Territories consequent on reorganisation are under computation by the Surveyor General of India. The population of these States and Territories is as estimated by the Registrar General, India on the basis of 1961 Census.

In the case of Jammu and Kashmir the population figures exclude information of areas under unlawful occupation of Pakistan and China where census could not be taken. The population census of Goa, Daman and Diu was taken by the Portuguese Government on 15-12-1960 before the territory was nationally united with India on 20-12-1961. The population figures represent the present population as on that date.

TABLE 2

This table shows the number and population of towns in India by classes (I—VI). The various classes of towns are in the following ranges;

Class I = over one lakh Class II = 50,000 to one lakh Class III = 20,000 to 50,000 Class IV = 10,000 to 20,000 Class V = 5,000 to 10,000 Class VI = under 5,000

TABLE 3

This table shows the population of cities (with population one lakh and over) in each State in 1961 along with increase over the 1951 Census.

TABLE 4

This table gives State-wise population enumerated in seven censuses from 1901 to 1961 along with the decennial percentage variations.

TABLE 5

This table explains the figures of density distribution related to percentage of population involved in each density range in the States.

TABLE 6

This table shows the ranking of the States and Union Territories in order of population and area.

TABLE 7

This table explains the economic classification of the population.

TABLE 8

Expectation of male and female lives at birth and ages 10, 20, 30, 40, 50 and 60 years in the census years 1881-1961 for all India have been shown in this table.

TABLE 9

This table shows the population according to numerically important religions of India—Buddhism, Christianity, Hinduism, Jainism, Islam and Sikhism with the percentage increase during 1951-61. Other religions have been collectively presented under others. In consequence of the re-organization of States and Union Territories certain areas were transferred from one political unit to another for which tabulations by single religions were not made in 1951 or thereafter. The strength of each religion for such areas was therefore estimated for 1951 by the ratio and proportion methods.

TABLE TO

The figures represent the population and percentage distribution of members of scheduled castes and scheduled tribes in States and Union Territories.

TABLE II

This table shows statewise estimated mid-year population for the years 1961-67. The method of estimation is as given below:

The population for 1966 and 1971 was projected by component method taking 1961 census population (on 1st March) as the base. The mid-year population between 1961 and 1966 was estimated by using the formula.

$$T_m = T_{\theta I} (I+r)^{m+I/3}$$

Where r is geometric growth rate obtained from the population of 1961 and 1966. T_m stands for mid-year population for the mth year and $T_{\theta r}$ stands for mid-year population estimated for 1961 census (1st March), m may take value 62, 63, 64 and 65 respectively. The same procedure was adpoted in case of 1966 and 1971 population where 1966 was taken as a base year.

⁽¹⁾ The area figures are computed by the Surveyor General of India and cleared by the Central Statistical Organisation.

⁽²⁾ Includes following figures of North East Frontier Agency:
81.426; 177,680; 158,878; 336,558: 336,558, in respect of columns (2) to (6) respectively.

⁽³⁾ The population figures exclude population of areas under unlawful occupation of Pakistan and China where Census could not be taken.

⁽⁴⁾ According to the Punjab Reorganisation Act 1966, the state of Punjab was reorganised on 1-11-66 into the states of Haryana & Punjab and Union Territories of Chandigath and Himachal Pratiesh. Areas of these states and Union Territories are under computation by the Surveyor General of India. The population figures are the estimates based on the 1967 census.

⁽²⁾ Includes North East Frontier Agency for which figures in respect of 1961 to 1967 are 338, 344, 350, 356, 362, 368 and 375 thousands respectively.

Meteorological data are recorded at some 380 observatories of the indian Meteorological Department and over 3,200 rain recording stations maintained by the different State Governments

The meteorological sub-divisions shown correspond more or less to the chief political divisions of India. They underwent revision during 1950 as a result of merger of States and formation of new States and again with effect from first January, 1957 consequent on reorganisation of States.

Rainfall-

Table 12:--

This table shows the normal and actual mont by rainfall during the year 1965 and actual rainfall during the years 1951, 1956 & 1958 to 1965 for various meteorological sub-divisions of the country. The figures for normal raifall are averages of rainfall data for the period 1901—1950. The minimum length of the period used for working out the normal rainfall of any station is five years and the maximum is eighty years. Normals of rainfall of about seventy-five per cent of the rain-gauge stations whose normals have been utilised in calculating the normals of rainfall for the various sub-divisions are, however, based on data for thirty years or more.

Actual rainfall is recorded at 0830 hours I.S.T. each day throughout the country. The amounts measured give the rainfall of previous 24 hours. The rainfall data are tabulated at the offices of the State Officers controlling registration of rainfall and published in the State Gazettes. They are subsequently consolidated and issued by the Indian Meteorological Department in the form of two publications each year, viz. (i) Daily Rainfall of India and (ii) Monthly Rainfall of India.

⁽a) Data relate to Tamil Mad Sub-Division only.

⁽b) Data relate to Travancore-Cochin Sub-Division only.

Available statistics regarding agriculture, in the following tables cover a period of ten years. While total figures for the whole of India are shown for the earlier years, the state-wise distribution is only for the latest year. Figures relate to the Indian Union and include all states and union territories. The source for the data is the Ministry of Food, Agriculture, Community Development & Cooperation who in turn depend on the individual State authorities for primary returns.

Table 13-

Area according to village papers is worked out from the returns preppared by the village staff for revenue purposes.

Figures of forest area shown in the table are taken from 'Indian Agricultural Statistics' brought out annually by the Directorate of Reonomics and Statistics, Ministry of Food, Agriculture, Community Development & Cooperation. These figures do not tally with the corresponding figures of area given in Tables 26, 28 & 29 because of: (i) The figures presented in the 'Agricultural Statistics' generally relate to the agricultural year (July-June) whereas the 'Indian Forest Statistics' relate to the financial year (April-March); (ii) In the Indian Forest Statistics Returns, the whole area including 'non-wooded' area under the control of Forest Departments is taken as area under forests while in Agricultural Statistics it is classified according to its actual utilisation; & (iii) Forest Department reports are expected to cover all forests areas in the state but Agricultural Statistics relate only to the 'reporting areas'.

Area not available for cultivation is land which is absolutely barren or uncultivable or covered by buildings, water or roads or otherwise appropriated for non-agricultural purposes.

Other uncultivated land excluding fallows denotes land for cultivation but not taken up and includes culturable waste, permanent pastures and other grazing lands and land under miscellaneous tree crops.

Fallow lands denote culturable areas which after abandonment remain uncultivated over a defined period of varying length in different States up to 1950-51. From 1950-51 a new classification of land area has been adopted under which "fallow lands" have been split up into "current fallows" and "other fallow lands". Standard definitions have now been laid down to be followed uniformly by all States. Lands lying fallow upto a period of one year are included under "Current fallows", those lying fallow for more than one year but less than five years are included under "other fallow while those lying fallow beyond a period of five years are included under "culturable wastes" or under "miscellaneous tree crops and groves" (not included under net area sown) as the case may be. Before 1950-51 the practice differed from state to state, e.g., in Bombay, lands lying fallow up to a period of 10 years were included under fallows while in Punjab those lying fallow for more than two years were classified under "other uncultivated lands excluding current fallows". Thus the figures of land area classification before and after 1950-51 are not strictly comparable.

Net area sown, area sown more than once and total cropped area.—In computing the aggregate net area sown, area sown more than once has been counted only once. However, while calculating the total cropped area, if different crops are raised in a year on a given land, the same area is accounted more than once.

Tables 14 and 15 —

Figures are given for area and yield of 33 principal crops, Regular all-India forecasts are issued in regard to most of these crops, viz., all foodgrains, oilseeds, fibres, potatoes, sugarcane, ginger, black pepper, chillies and tobacco. The estimates of area and production of coffee and rubber are based on special returns received from the State Governments in connection with the all-India publications on these crops. Data regarding tea are as extracted from the publications of the Tea Board from 1960-61, onward, while for earlier years the data are based upon returns received from State Governments. The estimates for coconut are again ad hoc estimates.

The figures in respect of cereals and gram relate to both reporting and non-reporting areas while those for other crops refer to reporting areas only. The estimates relating to non-reporting areas are based on special returns from State Governments.

The data relate to crop year ending June unless otherwise stated. Figures for the latest year are the final forecasts while those for the previous year are partially revised estimates as issued from time to time along with the final lorecasts. Figures for earlier years are revised estimates.

The variation in coverage and changes in methods of estimation have introduced some incomparability over time. The changes in coverage (area) since 1949-50 do not substantially affect comparability, but improvements in the methods of estimating yield rates and total production (specially in case of foodgrains) were introduced mainly after 1949-50.

The total of area figures shown in table 15 would fall short of the total cropped area by about 10 per cent due to the non-inclusion of (i) certain crops such as condiments and spices, indigo, and other dyes, opium and other drugs and miscellaneous food and non-food crops for which yield figures are not estimated and (ii) non-reporting areas under some of the forecast crops mentioned earlier.

Table 16-

Average yield per hectare in quintals of 26 principal crops and 5 plantation crops, namely, tea, coffee and rubber is shown in this table. Average yield per hectare have generally been calculated on the basis of area and production figures rounded upto 'hundreds'. In the case of tea, coffee, rubber and also in the case of states or union territories for which area/production of a crop is below 10 thousand, average yield have been calculated on the basis of area and production upto the unit place.

Table 17-

This table shows the index of agricultural production in India on base crop year ending June 1950=100. The index covers 28 crops divided into two main groups and six sub-groups. Weights have been assigned to different crop indices in proportion to the total value of production of each crop during the base period. The output has been evaluated at annual harvest prices prevailing during the year. In a few cases where reliable harvest prices were not available, average wholesale prices during the post harvest period have been used with appropriate adjustment. The crops included and weights allotted to each are mentioned in the table.

The index numbers have been constructed by the chain base method in order to provide for changes in the estimated production due to extension in the geographical coverage or to variation in the method of estimation over time. These indices are, therefore, better indicators to be used rather than the absolute figures in analysing the trends of production as a whole or of any of the commodity. The sub-groups, the groups and all commodity index numbers are the weighted arithmetic averages of production indices of crops covered. The concept of production for the series is gross, no allowance being made for seed or wastage. Livestock products and certain minor crops are not included in the index.

Table 18--

This table gives an account of agricultural implements and machinery in actual use as recorded in the quinquennial livestock censuses. Statewise details are also given for the year 1966.

4. LIVESTOCK AND FISHERIES

Cables 19 and 20

These tables give the number of livestock and poultry and the number of working cattle in India.

Data regarding the number of livestock and poultry, besides agricultural implements (shown separately under Agriculture), are collected through a tensus conducted quinquennially. In the rural areas primary data are collected through the village revenue agencies where they exist and through other local staff, where they do not. In the urban areas, staff of the municipal or notified area committees collect the information. The data are compiled by the Departments of Agriculture, Veterinary or Land revenue, as the case may be, in the different States, and consolidated returns showing district-wise details are furnished to the Directorate of Economics and Statistics, Ministry of Food, Agriculture, Community Development & Cooperation.

Data collected during the 1951 census have better coverage than before as result of political integration of the country after Independence. Orissa and Manipur could not conduct the 1951 Livestock Census and as such data for these States as in 1945 have been repeated. Data for earlier censuses have been shown after adjusting them, as far as possible, to the 1951 administrative set up. But they are not strictly comparable owing to variation in coverage.

The Livestock Census for 1956 was conducted with reference date as 15th April, 1956 in all States except Orissa and Manipur where the census was conducted only in 1957 due to certain administrative and other difficulties.

The livestock census for 1961 was conducted in all states, with 15th April, 1961 as the reference date; the reference date for Jammu & Kashmir being the 1st of November, 1961.

The Livestock Census for 1966 with reference date as 15th April, 1966, was conducted in all the States and provisional figures for the available States are given in the table.

Tables 21 to 23

These tables give the production of milk and milk products, utilization of milk and estimates of raw wool production in India. Figures for production of milk, ghee and butter are estimates based on the livestock census. For consumption of milk, the source is the marketing reports issued by the Directorate of Marketing and Inspection, Ministry of Food, Agriculture Community Development & Cooperation.

Tables 24 and 25

These tables give statistics of fish catch and landings by groups of species and their disposition.

Table 26:

This table deals with area of forest lands as shown in the Reports on Administration of Forests in the different states of the Indian Union. Areas under forest are classified by the types of (i) Composition, namely coniferous (soft-wood) and non-coniferous (broad leaved). Coniferous forest is one in which 80 per cent or more of the volume is of coniferous species and nonconiferous (broad leaved) forest is one in which 80 per cent or more of the volume is of non-coniferous species, both hard and soft; (ii) Functions, namely merchantable and non-merchantable. Forests which are within the reach of economic management or exploitation as sources of forests products including immature forests and managed forests where fellings are prohibited, are known as merchantable forest and forests which are not yet managed or exploited owing to inaccessibility or on account of forest produce in them being unsaleable are known as non-merchantable forests (or inaccessible and unprofitable forests); (iii) Legal Status such as "reserved", "protected" and "unclassed". Reserved forest is one which is permanently dedicated either to the production of timber or other forest produce and in which right of grazing and cultivation. is seldom allowed. In protected forests, these rights are allowed subject to a few mild restrictions. Unclassed forests occur mostly in Madhya Pradesh, Assam, Bihar and Bombay and consist largely of inaccessible forest or unoccupied waste; and (iv) Ownership, namely, area owned by (a) Forest Department; (b) Civil authorities (c) Corporate bodies and (d) Private individual Figures of forest area shown in this table have been taken from 'Indian Forest Statistics' brought out annually by the Directorate of Economics & Statistics, Ministry of Food, Agriculture, Community Development & Cooperation. These figures do not tally with the figures of forest area shown in table 13 under 'Agriculture' section. The reasons for differences in these two sets of figures are explained in the explanatory note to table 13 on page 31 ance. Figures shown in the table are provisional and subject to revision.

Table 27:

Forest produce is classified as major produce and minor produce in this table. The column 'others' under major produce comprises 'round wood' and 'pulp wood' while that under minor produce includes animal products, fibres and flosses, rubber and latex incense and perfume wood, vegetable oils and oilseeds, etc. Figures of quantity along with total value are shown in the case of the former and value only in the case of the latter.

Table 28 :

This table gives gross and net revenue and total expenditure of forests.

Tables 29 to 31:

These three tables give figures regarding:

(i) area of forests protected from fire and cattle.

(ii) progress of forest regeneration and afforestation.

(iii) employment in forestry and forest industry.

Total figures have been shown from the years 1950-51 to 1961-62, whereas statewise details are shown for the latest available year. The figures relating to "total area of all forests under Forest Department", given in table 29, are inclusive of other forest area which is also controlled by the Forest Department.

Further details concerning forest statistics are available in the *Indian Forest Statistics* and other publications of the *Ministry of Food and Agriculture* namely, 'Agricultural Statistics of India' Volumes I and II.

6. SERICULTURA

Tables 32 to 33

Available data relating to sericulture, which are restricted to the production of raw silk and silk-yarn, have been collected by the Central Silk Board, with the co-operation of Sericulture Departments in the States and are presented in these tables.

Raw silk is of two kinds, viz., mulberry and non-mulberry. The ditinction arises from the rearing of silk-worms upon either mulberry leavs or other plants. Mulberry silk is produced mainly in Mysore, West Benge^S Jammu and Kashmir, Assam, Punjab and Madras although some other Staat' have made some progress in this direction under their development plates Non-mulberry silk comprising Tasar, Eri and Muga s produced in Asns. Bihar, Madhya Pradesh, Orissa and West Bengal.

The different types of mulberry and non-mulberry silk and spun silk and noil-yarn are further defined as follows:

Filature Silk.—It is silk reeled in factory-type units from cocoons of silkworms fed on mulberry leaves. There are filature establishments in the States of Mysore, Jammu and Kashmir and Uttar Pradesh (only in Dehradun). Filature silk is considered superior to 'Charka' silk.

Cottage Basin Silk.—Cottage basin silk is the silk reeled on 'Cottage basin' from cocoons of silkworms fed on mulberry leaves. The 'Cottage basin' is an improved reeling equipment superior to Charka and has modern mechanical gadgets capable of yielding better quality raw silk as compared to Charka silk.

Charka Silk.—It is silk reeled in cottage establishments from cocoons of silk worms fed on mulberry leaves. At present bulk production of mulberry silk is reeled on 'Charkas'. Besides, there are different types of 'Charkas' used for reeling non-mulberry silk.

Dupion Silk.—Coarse uneven silk reeled from double cocoons which are Cocoons spun by two silkworms. The unwinding of double cocoons will not be uniform hence unfit for being used in regular reeling.

Tasar Silk.—It is silk reeled from cocoons of silkworms belonging to saturnidae family, which are fed on leaves of Oak, Asan and Arjan trees. Tasar silk is mainly produced in Bihar, Madhya Pradesh, West Bengal and Orissa.

Eri Silk.—It is silk spun from cocoons of silkworms belonging to saturnidae family, which are fed on castor leaves. Eri yarn is produced in Assam, Bihar & West Bengal.

reeled and hence it is only spun.

It has natural copperish colour.

Muga Silk.—It is silk produced only in Assam from cocoons of silkworm belonging to saturnidae family, which are fed on Som and Soalu leaves. It has a rich golden colour.

Spun Silk Yarn.—Yarn composed of Silk filaments of lengths ranging from 1 to 8 inches produced by bleaching, dressing and spinning the silk waste which is the by-product of the raw silk reeling industry.

Noil Yarn.—It is short-stapled residue obtained during dressing operations in silk spinning from silkwaste. It is a by-product of spun silk industry. Silk yarn can be spun from silkwaste and pierced cocoons, which cannot be reeled.

7. IRRIGATION

Statistics of area irrigated from different sources and total area of crops irrigated are presented under this section. All India totals are shown from 1950-51 and the state-wise distribution is given for the latest available year.

Table 34-

Total area irrigated from different sources in this table represents net irrigated area. If two or more crops on a given piece of land are irrigated in the same year from the same source, the area is counted only once.

Table 35-

Total irrigated area under various crops shown in this table represents gross irrigated area and includes area irrigated under more than one crop during the same year. Area irrigated more than once in a harvest is rounted only once.

Table 36:

Statistics of production of various minerals upto 1955 included in this section are taken from the Annual Review of Mineral Production in India Figures for mines covered published by the Geological Survey of India. by the Indian Mines Act (1923) were collected by the Chief Inspector of Mines and supplemented to the extent possible, in respect of Non-act mines by the Geological Survey of India. From 1956 the bulk of the statistics included here are based on returns received under the Minerals Conservation and Development Rules, 1955 and 1958. The data are collected and compiled now by the Indian Bureau of Mines. The Minerals Conscrvation and Development Rules are not applicable to (1) Petroleum and natural gas (2) Coal (3) minor minerals declared as such by the Central Government under section 3 of the Mines and Minerals (Regulation and Development) Act, 1957 and (4) any mineral declared as prescribed substance for the purposes of the Atomic Energy Act, 1948. Statistics of coal production are collected from the office of the Coal Controller while those for salt are obtained from the Salt Commissioner. Figures relating to atomic energy minerals are not available for publication. Data for production of crude petroleum are compiled by and have been obtained from the Ministry of Petroleum and Chemicals. Value figures are, however, not yet available. Figures for Mica production upto 1955 relate to dressed Mica and are incomplete. Reliable Statistics of crude Mica production are available from 1956. The basis of valuation for all minerals is the pit's mouth value of production. for total value of minerals include estimated value of 'minor minerals' which are outside the scope of Minerals Conservation and Development Rules, but exclude value of petroleum and minerals prescribed under the Atomic Energy Act, 1948. The total value figures upto 1955 include value of dressed Mica output and thereafter the value of crude Mica output. I'otals are given for 1951 and 1955 and for the years 1958 onwards while mineral-wise and State-wise details are shown for the latest two years (1965 & 1966).

Data relating to mineral production in the Union Territory of Goa, Daman and Diu are not obtained under the Mineral Conservation & Development Rules, but the information about production of iron ore and manganese ore is collected by the Dte. of Industries & Mines, Goa.

Table 37:

The index of mineral production on base 1960=100 given in this table covers 37 minerals classified into four broad groups according to the Standard Industrial Classification finalised by the Central Statistical Organisation in consultation with the Indian Bureau of Mines, as (1) Coal Mining; (2) Metal mining; (3) Stone quarries, clay and sand pits, and (4) Other non-metallic mining and quarrying. Statistics of production given in the table provide a framework for the index. Weights have been allotted to the different items in proportion to the net value of production of different minerals in 1960. The index is compiled on the basis of fixed base method. The indices for sub-groups, groups and all minerals are weighted arithmetic averages of the relevant items.

Table 38:

This table on the working of mines in India relates to mines under Indian Mines Act (1952). Petroleum and salt are the only important minerals not covered by the Act. Totals are given for 1951, 1955 and 1957 onwards while mineral-wise details are shown for the latest year 1965 & 1966.

⁽P) Provisional.
N.R. Value of out put of miner minerals not received yet from the State Government of Punjab.
(1) The value of Mineral production from Goa has not been included as the returns under M.C.D.R. 1958 have not so far been received from the mine owners.
(2) Data for 1951 to 1965 exclude (a) Petroleum (b) minerals declared as prescribed substances under Atomic Energy Act, 1948. Figures for 1966 exclude Petroleum and minerals declared as prescribed substances under the Atomic Energy Act, 1948 as well as minor minerals the figures of which have not so for been received from the State Governments.
(a) Includes value of Salt production in Goe as reported by the Salt Commissioner, Data for previous years are not available.

previous years are not available.
(b) Under reference.
(c) Pertains to minor minerals.

This Section deals with the following items:-

- (a) Annual Survey of Industries,
- (b) Production of cotton yarn and piece goods,
- (c) Manufacture of salts,
- (d) Production of certain selected industries and
- (e) Index of industrial production.

Explanatory notes on the tables under each of the above items are given below:—

Tables 39-40

Annual Survey of Industries—The Annual Survey of Industries replaces the Census of Manufacturing Industries with effect from 1959. The publication of data obtained through the Annual Census of Manufactures, conducted under the authority of the Industrial Statistics Act, 1942 covering 29 industries has been discontinued. These tables give State and industry-wise information on important characteristics of manufacturing industries as published in the first Annual Survey of Industries, 1959 and subsequent Surveys for the years 1960 to 1964. The annual Survey is conducted under the authority of the "Collection of Statistics Act, 1953" and the "Collection of Statistics (Central) Rules, 1959" framed thereunder.

Scope and Coverage—The coverage of the Survey extends to all factories, registered under Factories Act, 1948. The factories in Jammu and Kashmir are covered on a voluntary basis. Factories in the Union territory of Pondicherry and Goa have also been covered under the Annual Survey for 1962 and 1964 respectively. The data relate to factories employing 50 or more workers with the aid of power and 100 or more workers without the aid of power.

Period covered—The Survey relates to the calendar year except in the case of sugar industry for which the year ending 30th June is adopted. Factories engaged in Cotton Ginning, Cleaning and Pressing and Electric Light and Power are, as a special case, permitted to submit returns for year ending 31st August and 31st March, respectively. Factories in Jammu and Kashmir are also permitted to submit returns for year ending 31st March.

Productive capital—It consists of fixed and working capital. The former comprises land, buildings, plant, machinery, furniture, etc., and the latter consists of stocks of materials, fuels, semi-manufactured products, cash in hand and at the bank, etc.

Number of persons employed—This is computed by taking the total attendance of persons in all the shifts on all the days and dividing it by the number of days worked. It includes persons attending and on leave with pay, and also those engaged in welfare activities.

TO2 INDUSTRY

Workers — The term "workers" is used in the same sense as in the Factories Act, 1948 but excludes persons holding positions of supervision or management or employed in a confidential position. Under the Factories Act, a worker has been defined as "a person employed whether for wages or not in any manufacturing process, or any other incidental or connected work".

Man-hours worked— "The number of man-hours worked" during the year is calculated by multiplying the number of workers employed in each shift by the number of hours in the shift and aggregating the products for all shifts on all the working days in the year.

Salaries and Wages—The term "salaries/wages" includes all payments made in cash such as basic wages, dearness allowance, overtime payments, shift allowance, leave wages, bonuses etc.

Money value of benefits—These include benefits like supply of cheap foodgrains, medical and educational facilities, payment of pensions, gratuity, employers' contributions to provident fund, and Employees State Insurances etc.

Value added by manufacture—This represents that part of the value of the product which is created in the factory. It is computed by deducting from the gross ex-factory value of output, the gross value of input comprising cost of fuels, and materials used, industrial services purchased and depreciation of fixed assets. From 1961, it also takes into account the value added in merchanting transactions. In 1959, depreciation was calculated at the rates allowed by Income Tax authorities for assessing taxable income while in later years it was taken as reported in the factories returns.

Tables 41-43.

Gotton Mills Production—Detailed data of cotton yarn and cloth production by variety and by States are presented in this section. The information is based on statutory returns obtained under Cotton Textile (Control) Order, 1948. All the units of the organised Cotton Textile industry, i.e., both mill and power loom sectors have been covered.

Table 41

Mill Production of cotton yarn in India—The fineness of yarn is expressed in terms of the English Cotton Count. The count of particular yarn is said to be 'x' if 'x' hanks (each of 840 yards) of that yarn together weigh I lb. To illustrate, I lb. of yarn of 40s count will measure 40×840 yards. The count measures the length per unit weight. The finer the yarn higher is the count number and the coarser the yarn the lower is the count number.

Table 44

Manufacture and Issue of Salt—This table shows the sources of supply, stocks at the beginning of the year, salt manufactured by Government and otherwise and total issues of locally manufactured salt (including wastage). Figures of production by unlicensed small scale manufacturers are given separately Figures for the year 1966 are shown by sources of supply.

Industry 103.

Table 45

Production of Selected Industries—The data contained in this table cover 96 industries. Returns are received from producing unit on a voluntary basis except in the case of coal, sugar, jute mill machinery, salt, cotton textiles, Woollen textiles and iron and steel, all minerals except petroleum and gold where the collecting agencies have power to call for returns.

Figures for organized industries like steel, salt, coal, sugar, cement, cotton textiles, paper, jute, matches, etc., cover the entire production in the country. Jute production figures from January 1951 relate to mills in the membership of Indian Jute Mills Association which account for nearly 95 per cent of the entire output. Figures for other industries represent all organised factories in those industries but small units have been left out. An elaborate account of scope and coverage of statistics published in this table may be had from Appendix I to the Monthly Statistics of the Production of Seleteed Industries of India for January and February 1967. The installed capacity in every case refers to the close of the period.

Table 46

Index of Industrial Production (Revised)

Base: 1956 == 100.

Coverage—Based on statistics of production set out in table 45 covering 201 items.

Weights---Weights have been allotted to various items in proportion to the estimates of value added by manufacture in the base year. The respective weights for various industries are mentioned in Table 46.

Computation -- Index is a simple weighted arithmetic mean.

Dresel Engines (stationary type).

⁽¹⁾ The actual pductionhas, since 1951, been much in excess of installed capacity because while installed capacity hasbeen calculated for a single shift working but one of the two units, has been working for more shift.

10. POWER

Tables 47-48:-

Figures presented in this section relate to installed plant capacity/generation and sales of electricity by public utility electric supply under takings in the Indian Union including Jammu & Kashmir, whether owned by Government, local authorities or companies. Military and factory power stations are excluded as also Railway power station with the sole exception of Chola Power Station, Bombay, which is inter-connected (with the Tata Power System). Figures for generation include purchases for public supply from non-public utilities. However, power purchased from adjoining State is not included under the Purchasing State, as this is already accounted for in the corresponding: generation figures of the selling State. State-wise details are given for the latest year.

Figures giving the analysis of installed capacity according to type of plant are as on 31st December, upto 1956 and thereafter as on last: day of financial year.

II. BANKS

The tables in this section present a consolidated picture of progress of banking in India, showing liabilities and assets of several important classes of banks such as:—

- (1) Reserve Bank of India,
- (2) Indian banks comprising-
 - (a) The State Bank of India and other Indian scheduled banks,
 - (b) Indian non-scheduled banks, i. e., banks not included in the second schedule to the Reserve Bank of India Act,
 - (c) State and Central Cooperative Banks.
- (3) Foreign scheduled banks, whose registered offices are located outside the Indian Union.

Besides the above information, tables showing (i) percentage of cash balances to liabilities on deposits of several classes of bank, (ii) total number and amount of cheques cleared, (iii) working of Industrial Finance Corporation of India and (iv) State Financial Corporations are also given.

Some further notes are given below-

TABLE 49-

Progress of Banking in India

- A: Liabilities and Assets of Reserve Bank of India (Banking Department)—Figures relate to the Indian Union.
- B: Liabilities and Assets of State Bank of India—State Bank of India was formed in July 1955, after the nationalization of the Imperial Bank of India. Figures in this table relate to the business of the bank both in the Indian Union and abroad.
- ·C: Liabilities and Assets of Foreign Scheduled Banks—Data are as on the date of the balance sheets and relate to their business in the Indian Union only.
- D: Liabilities and Assets of Indian Commercial Banks—This table in cludes commercial banks having their registered offices in the Indian Union. Figures relate to the business of the bank both in the Indian Union and abroad.

E: Liabilities and assets of Indian Co-operative Banks—Co-operative banks included in this table comprise State and Central co-operative banks.

TABLE 50-

Relates to percentage of cash balances to total deposits of different classes of banks as defined above.

TABLE 51-

Cheque Clearance—The table shows the number and amount of cheques cleared at each principal clearing centre managed by the Reserve Bank of India. The total for all other centres comprising clearing houses managed by the State Bank of India, Subsidiaries of the State Bank and Sangli Banks is shown separately. The management of the clearing house at Bangalore, New Delhi and Nagpur was taken over by the Reserve Bank of India in October 1953, August 1956 and March 1957 respectively.

TABLES 52 & 53-

Relate to the working of the Industrial Finance Corporation of India and the State Financial Corporations respectively and furnish data on the liabilities and the assets of the same.

TABLE 49—PROGRESS OF BANKING IN INDIA A-Liabilities and assets of the Reserve Bank of India

12. CO-OPERATIVE SOCIETIES

TABLES 54-61

The tables in this Section present, in an abstract form, the working of the co-operative movement in India. Separate statements are given in regard to the operation of State Co-operative Barks, Central Co-operative Banks, Primary Credit Societies (Agricultural and Non-agricultural), Grain Banks, Central Land Mortgage Banks, Primary Land Mortgage Banks and Primary non-Credit Societies. State-wise breek-up for the latest year is given in respect of all these co-operative banks and societies, except for primary non-credit societies for which the break-up is given according to types. The statistics from different States, except Jammu and Kashmir, pertain to the year ended 30th June. For Jammu and Kashmir the period of reference is the year ended 31st March.

⁽¹⁾ Including deposits.

⁽²⁾ Pigures relate to joint and collective farming acgistics.

⁽a) Income from services rendered.

⁽b) Catch.

⁽c) Value of houses constructed.

Statistics relating to Joint Stock Companies are based on returns received from Registrars of Joint Stock Companies. Upto the year 1959-60 the 'capital' position of 'Companies at work' are given on the basis of return submitted to Registrar of Joint Stock Companies and from 1960-61 onwards they are taken from the balance sheets of Companies.

TABLES 62-64

Statistics are given for number and paid-up capital of companies liability of which is limited by shares only. Industries are classified according to International Standard Classification of Economic Activity adopted in 1954-55. Earlier figures according to old classification were published in previous issues of the Abstract.

TABLE 65

Number of Foreign companies which carry on business in India is shown in this table. The figures relate to companies incorporated electure than in India, chiefly with sterling capital.

TABLE 66

The Reserve Bank of India published the official series of index numbers of industrial profits with 1950 as base. In 1961 the series was revised by shifting the base to 1955. These series for the period 1951 to 1962-63 were published in the earlier issues of the Statistical Abstract of the Indian Union. The index has again been revised, shifting the base period from 1955 to 1960-61. The revised index numbers for the period 1961-62, 1963-64 & 1964-65 are presented in table 66. For the purpose of these lindex numbers, profits have been taken in two different ways:

- (i) Gross profits which is the sum of profits before tax, managing egents' remuneration, interest charges and depreciation provision; and
- (ii) Profits before tax, which is the sum of tax provision, dividends distributed and retained profits.

For compiling the primary data on profits the empanies have teen grouped in accordance with the International Standard Industrial Classification of All Economic Activities as adopted by the Govt. of India.

The index numbers relating to public limited companies are based on the data relating to the sample of 1333 public limited companies included in the study on company finances, 1963-64. For each industry, index numbers of gross profits (including depreciation) and of profits before tax are worked out by dividing the figures for each year by the corresponding figure for the year 1960-61.

The indices for the main groups and the general index for all industries are weighted averages of the indices of the relevant individual industries the weights being proportional to the ratio of paid-up capital of all companies as at the end of March 1961 to the paid-up capital of selected companies at the end of the study year 1960-61, in the different industries. The formula used for compiling these indices is:

$$li = \frac{\sum_{j=1}^{n} P_{ji} \left(\frac{X_{j}}{x_{j}} \right)}{\sum_{j=1}^{n} P_{jo} \left(\frac{X_{j}}{x_{j}} \right)} \times Ioo$$

in which, Ii represents the index for the *i*-th year, *Pji* profits of the selected companies of the *j*-th industry for the *i*-th year, *Xj* paid-up capital of all companies in the *j*-th industry as at the end of March 1961, *xj* paid-up capital of the selected companies at the end of the study year 1960-61 and *n* the number of industrial groups.

Source: Reserve Bank of India.

⁽¹⁾ Includes (i) transport equipment, (ii) electrical machinery, (iii) machinery other than transport and ejectrical, (iv) ferrous/non-ferrous metal products, and (v) foundries and engineering workshops.

⁽²⁾ Includes (i) basic industrial chemicals, (ii) medicines and pharmaceuticals and (iii) other chemicals

14. INSURANCE

Figures in this section refer to the insurance business of insurers who transacted business under the Insurance Act, 1938. The Postal Life Insurance Fund (Tables 71, 71A, 72 & 72A) is, however, exempt from the operation of the Act. From the 1st September 1956, life insurance was nationalised and the existing business of Indian insurers, and Provident Societies and Indian business of foreign insurers was vested in the Life Insurance Corporation of India.

LIFE INSURANCE-

Table 67-

This table gives the revenue account of the life insurance business in India. Figures are for the calendar year ending 31st December except in the case of the year 1962 which covers 15 months as L.I.C. have changed over to financial year as their accounting period, from 1st April 1963.

Table 68-

This table shows the summary of balance-sheets of Indian Insurers.

Table 69-

This table shows the summary of the balance-sheet of Life and Non-Life business of the Life Insurance Corporation of India.

Table 70-

This table gives the new life insurance business by Indian Insurers during the year and total business in force at the end of the year.

POSTAL INSURANCE

Tables 71, 71A, 72 & 72A-

The postal insurance data are shown separately for whole life and endowment, upto the year 1963-64. As the accounts for the two, have been amalgamated and are not being maintained separately from April 1964, consolidated data for whole life and endowment postal insurance, are shown in Tables 71 and 72 from 1964-65 onwards, while data for earlier years are shown in Tables 71A and 72A. Data for all the four tables include information about the 'Civil' and 'Defence' Wings of the Post Office Insurance Fund. Opening and Closing balances shown in these tables include share of Pakistan, as the separation of policies for which Pakistan is liable, has not been completed as yet.

FIRE, MARINE AND MISCELLANEOUS INSURANCE—

Table 73-

Figures for Insurers are for calendar year ending 31st December while those for Life Insurance Corporation of India are for financial year ending 31st March.

Table 74-

Figures are for calendar year ending 31st December.

⁽a) Includes the sasets relating to the general department of insurers who were doing both life and general insurance business. This was not encluded in the figures for 1955 and earlier.

### 15. TRADE

### (A) FOREIGN TRADE

The figures represent trade with foreign countries both on private and government accounts, registered at Indian sea-ports, airports and land customs stations. With effect from April, 1963 trade arising in the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Islands is included. In the case of Nepal, airborne trade alone was covered upto March 1964 subsequent to which it covers both by land and air.

#### IMPORTS-

(Tables 75-76, 79-80, 82 and 84)

Import figures generally show the trade as declared by importers in the bills of entry (applications for clearance) and as checked by customs officials.

Goods entered for storage in bonded warehouses and afterwards exported therefrom are included under 'imports' and 're-exports'. Transhipment trade is not recognised for the purposes of Indian trade returns and is, thus, not included here. Direct transit trade is also excluded.

Imports of passengers' baggage are not included since November 1964.

All dutiable articles imported from foreign countries by parcel or letter post are included.

EXPORTS AND RE-EXPORTS-

(Tables 75, 77 to 79, 81 and 83)

Export figures represent the trade as declared in the manifests, of vessels cleared, which have been received and scrutinized with reports of notice of short shipment up to the last working day of the month or as near to that as is practicable but not earlier than 26th of the month. From the year 1951-52, however, a revised procedure for the registration of export trade statistics was adopted. The export trade statistics are now being compiled on the basis of trade as declared in the shipping bills passed up to the last working day of the month with necessary adjustments on account of short shipments. The figures of exports relate to Indian merchandise alone as distinct from exports of foreign merchandise which are classed as re-exports.

The classification of countries by 'commonwealth countries' and 'other foreign countries' followed in earlier issues of the Abstract for table on country-wise imports, exports and re-exports has been discontinued and the countries are listed in alphabetical order in tables 76 to 78 in this issue.

All articles despatched to foreign countries by parcel post are included but the contents of foreign letters despatched are not registered.

#### CLASSIFICATION OF TRADE BY COUNTRIES-

(Tables 76 to 78)

Imports are classified with reference to the countries whence they were consigned to India and not with reference to the countries whence they were shipped direct to India. The country of consignment is defined as that from which the goods have come whether by land and sea or by sea only or by air, without interruption of transit save in the course of transhipment or transfer from one means of conveyance to another. Thus the countries whence goods are consigned are not in all cases the countries of actual origin of goods since goods produced in one country may be purchased by a firm in another country and thence despatched after an interval to India.

Exports are credited to the country of final destination as declared by exporters in the shipping bills whether that country possesses a sea-port or not. The country of final destination is defined as that to which goods exported from India are intended to pass whether by sea and land or by sea only or by air without interruption of transit, save in the course of transhipment or transfer from one means of conveyance to another.

The figures are those declared by importers and exporters in the bills of entry and shipping bills. The value of goods represents the wholesale cash price less trade discount for which goods (i) the like kind and quality, are sold or are capable of being sold at the time and place of importation or exportation, as the case may be, without any abatement or deduction whatever, except (in the case of goods imported) of the amount of duties payable on the importation thereof; or (ii) where such price is not ascertainable, the cost at which the goods of the like quality could be delivered at such place without any abatement or deduction except as aforesaid. Import valuation in practice corresponds to c.i.f. method, but export valuation was, prior to April 1951, not strictly on f.o.b. basis as it did not take into account export duties and such items as dock charges, cost of transport, etc., up to the vessel. With effect from April 1951, however, the basis of export valuation has been changed so as to conform strictly to f.o.b. basis inclusive of export duty and/or cess where leviable.

#### CURRENCY AREAS-

(Table 79A & 79B)

The following classification has been adopted from the year 1956-57;

Dollar Area.—United States of America,* Canada (including Newfoundland and Labrador), Cuba, Haiti, Dominican Republic, Puerto Rico, Virgin Islands of the United States, Mexico, Guatemala, Honduras (not British), Salvador, Nicaragua, Costa Rica, Columbia, Republic of Panama, Panama Canal Zone, Venezuela, Ecuador, Bolivia, Hawaii, Philippines, Liberia and American Samoa.

^{*}Includes Alaska and Hawaii w.e.f. January, 1960.

Sterling Area:—All Commonwealth countries (excluding Canada) together with Irish Republic, Iceland, Jordan, Muscat and Oman, and Burma. Iraq has been transferred to 'other soft currency areas' subsequent to June, 1959 Cameroon and Somalia Republic have been included with effect from April, 1963.

Other Soft Currency Area: -All other countries.

Currency area figures include the latest adjustments and, therefore, do not always tally with the figures in the preceding tables.

The classification of countries by Currency Areas has been replaced by Economic Regions with effect from 1st April, 1965 as follows:—

Region 'o': Africa: Algiria; Basutoland; Bachunaland; Burundi, Cameroons; Canary Islands; Cape verde Islands; Central African Republic; Chad; Comoro Islands; Congo (Brazzaville); Congo Democratic Republic; Dahomey Republic; Ethiopia (including Eritrea); Gabon; Gambia; Ghana; Guinea; Ivory Coast Republic; Kenya; Liberia; Libya; Malagasy; Malawi; Mali; Mauritania; Mauritius and Dependencies; Morocco; Niger Republic; Nigeria; Other E. African Countries; Other African Countries; Reunion; Rhodesia; Rwanda; Sao Thome et Principe; Senegal; Seychelles; Sierra Leone; Somalia; South Africa; South West Africa; Spanish Sahara; St. Halena and Ascension; Sudan; Swaziland; Tanganyika (renamed as Tanzania-from 1966-67); Tangier; Togoland; Tunisia; Uganda; United Arab Republic; Upper Volta; West Africa, Spanish; Zambia; Zanzibar and Pemba (merged with Tanzania from 1966-67.)

Region '1': North America; Canada; United States of America.

Region '2': Latin America: Argentina; Bolivia; Brazil; Chile; Colombia; Costa Rica; Cuba; Dominican Republic; Ecuador; Guatemala; Haiti; Honduras, British; Maxico; Nicaragua; Panama Canal Zone; Panama Republic; Paraguay; Peru; Salvador; Uruguay; Venezuela.

Region '3': Other American Countries: American Samoa; Bahamas; Barbados; Bermuda; French West Indies; Guiana British (renamed as Guyana from 1967); Guiana French; Hondurous (Not British); Jamaica and Dependencies; Leeward Islands; Netherlands Antilles; Puerto Rico; St. Pierre Et. Miquelon; Surinam; Trinidad and Tobago; Virgin Islands of the United States; Windward Islands.

Region '4': ECAFE Countries: Afghanistan; Australia; Burma; Cambodia; Ceylon; China; Democratic Republic of Vietnam; Formosa; Hongkong; Indonesia; Iran; Japan; Korea North; Korea South; Laos; Malaysia; Nepal; New Zealand; Pakistan East; Pakistan West; Philippines; Singapore (seperated from Malaysia from 1966-67) South Vietnam; Thailand.

Region '5': Other Asian & Oceanian Countries and Antarctic and Arctic Regions: Aden; Antarctic Regions, Arctic Regions: Bahrein Islands, Cook Islands; Cyprus; Falkland Islands; Fiji Islands; Fisheries; French Oceania; Gilbert & Ellice Islands; Guam; Iraq; Israel; Jordan; Kuwait; Lebanon; Macao; Maldives; Mongolian People's Republic; Muscat and Oman; Nauru; New Caledonia (French); New Guinea; New Hebrides; Niue Island; Norfolk Island; Other Pacific Islands; Portuguese Timor; Qatar and Trucial Oman; Saudi Arabia; Solomon Islands (British); Syria; Territory of Popua; Tibet; Tokelau Island; Tonga; West Samoa; Yemen.

Region '6': East European Countries: Bulgaria; Czechoslovakia; German Democratic Republic; Hungary; Poland; Roumania; USSR; Yugoslavia.

Region '7': European Common Market Countries: Belgium; France; Federal Republic of Germany; Italy; Luxembourg; Netherlands.

Region '8': European Free Trade Area Countries: Austria; Denmark; Norway; Portugal; Sweden; Switzerland; United Kingdom.

Region '9': Other European Countries: Albania; Andorra; Channel Islands, Faeroe Islands; Finland; Gibraltar; Greece; Greenland; Iceland; Irish Republic; Liechtenstein; Malta and Gozo; Spain; Spitzbergen; Turkey.

INDEX NUMBERS OF QUANTUM AND UNIT VALUE OF EXPORTS AND IMPORTS

(Tables 82-83)

The first series of index numbers of exports and imports was calculated with reference to the year ending March, 1923 a; base. Owing to far reaching changes in the pattern of trade as well as in coverage of the statistics, specially after partition, a new series calculated with reference to the year ending March, 1949 as base, was introduced with effect from 1949-50. Re-export trade which was excluded from the old series was included in the export trade for the purposes of this index. To fit in with the changing pattern of India's foreign trade, anoth r revised series with 1952-53 as base was introduced with effect from 1953-54. Reexport trade was again excluded from the export index. Subsequent to the adoption of the Standard Indian Trade Classification in 1957, the wide disparity between the old and the new classification necessitated shifting of the base to a SITC period. Since the data for the first year (1957) of the revised classification was deficient in many ways, the year 1958 has been chosen as the new base period for the present revised series of index numbers.

A reference may be made to the earlier issues of the Statistical Abstract for notes relating to the scope, coverage and methods of construction of the earlier series of the index numbers. The present revised series with reference to period 1958 as base is described below:

### Scope and Coverage

The change in the base period to 1958 has rendered the new series for import trade index more representative than the previous series. The total value of articles included in the new imports index accounts for a coverage of 84% of the total value of imports of all articles as against 70% in the old series. Coverage of exports index, however, remained the same at 92%. The number of articles directly taken into account in calculations of the present series number to 511 for imports and 317 for exports. Larger coverage is

not attempted with a view to facilitating expeditious computation of the index numbers.

### Method of Construction

As in the case of old series, the revised Index Numbers are of the fixed base type. The unit value (Price) Index Numbers are calculated according to the Paasche formula. The Quantum Index Numbers according to Laspeyres formula are not computed separately but are derived from the former Indices.

The method of calculation of unit value Indices briefly consists of comparing the trade in the current period with that revalued at 1958 prices. Symbolically, the Index Number P is given by the formula:—

$$P = \frac{\sum p_n \ q_n}{\sum p_0 \ q_n}$$

where,  $p_o$  and  $p_n$  denote the value of an article in the base period and the current period respectively, and  $q_o$  and  $q_n$  its respective quantities in these periods respectively.

As mentioned above, the Quantum Indices are derived from the unit value Indices (P) as follows:

$$Q = \frac{V_n}{V_0} P \times 100$$

where,  $V_0$  and  $V_n$  are the total values of trade in the base and current periods respectively.

### Adjustment for Incomplete Coverage

It is not possible in practice to include all the commodities entering into trade since information on quantities is lacking for many miscellaneous items in the trade records. Such items cannot be included in the cross-valuations and hence do not appear directly in the compilation of Index Numbers. Adjustments have, therefore, been made in the final Index Numbers to allow for incomplete coverage. These adjustments are based on the assumption that the price changes in the items not covered in a section are similar to those shown by the items included in the calculation for the section. The method of adjustment can be explained symbolically as below:

The unit value Index (P) for the included items in a section is given by the formula:—

$$P = \frac{\sum P_{s} Q_{s}}{\sum P_{s} Q_{n}}$$
 (1)

The index for all the items of the section will be

$$P' = \frac{\sum' P_n Q_n}{\sum' P_o Q_n}$$
 (2)

while the aggregate  $\Sigma' P_n Q_n$  is known, the aggregate  $\Sigma' P_o Q_n$  is unknown and it cannot be computed directly. It is therefore estimated on the assumption that the price changes for the covered items and for all the items are the same. In other words, P' = P

i.e 
$$\frac{\Sigma' \ P_n \ Q_n}{\Sigma' \ P_o \ Q_n} = \frac{\Sigma \ P_n \ Q_n}{\Sigma \ P_o \ Q_n}$$

$$\frac{\Sigma' \ P_n \ Q_n}{\Sigma' \ P_n \ Q_n} \times \frac{\Sigma \ P_o \ Q_n}{\Sigma \ P_n \ Q_n}$$

$$= \frac{\Sigma' \ P_n \ Q_n}{\int \ \Sigma \ P_o \ Q_n}$$

$$= \frac{\Sigma' \ P_n \ Q_n}{\int \ \Sigma \ P_o \ Q_n}$$
Total value of all items in the section unadjusted Index for the section

The adjusted Index Number P' is obtained by substituting the above value of  $\Sigma'$  P₀ Q_n in the equation (2). The General Index is then derived by averaging the separately adjusted sectional indices appropriately.

Quantum Indices are similarly adjusted for incomplete coverage by using the adjusted unit value Index P' instead of the unadjusted Index (P) occurring in the formula for deriving the Quantum Indices.

### Adjustment for Seasonal Variations

For want of figures according to the revised trade classification for a long number of years, adjustments could not be made for seasonal variations. The adjustments will be made when the required data are available.

OVERALL BALANCE OF TRADE

(Table 84)

From April 1948 total values of foreign trade of India by all route (i.e sea, air and land) have been taken into account for purpose of calculating the balance of trade. All foreign trade transactions in gold, current notes and coins are included under treasure. Balance of trade in treasures is in gold and silver only up to December 1956 and gold only thereafter since trade in silver is included under merchandise.

### LAND FRONTIER TRADE

The tables in respect of this section have now been discontinued with effect from April 1964 in view of the more satisfactory arrangements for collection of statistics of India-Nepal Trade.

### (B) COASTING TRADE

### **Tables 85-86**

Coasting trade statistics represent the trade registered at the ports in States (old Provinces), that is, the trade between one State (old Province) on the one side and all other States (old Provinces and former Indian States, such as Kutch, Travancore etc.) plus certain other ports on the Indian coast (e.g., Goa, etc.) on the other. The trade among ports within the same State has not been included into the table presented here. Cochin Port which was a part of Madras block prior to April 1951 has from that date been constituted into a separate block.

Prior to April, 1957, the Indian Coasting Trade was recorded according to the following Maritime Blocks:—

(1) West Bengal, (2) Orissa, (3) Madras, (4) Travancore-Cochin, (5) Cochin Port, (6) Bombay and (7) Saurashtra, Okha and Kutch.

Consequent upon the reorganisation of the States, the following Maritime Blocks each of which corresponds to a Maritime State or Union territory, have been adopted from April, 1957:—

(1) West Bengal, (2) Orissa, (3) Andhra Pradesh, (4) Madras, (5) Kerala, (6) Mysore, (7) Bombay, (8) Andaman and Nicobar Islands

and (9) Laccadive, Minicoy and Amindivi Islands.

Further, Consequent on bifurcation of Bombay State, two separate maritime blocks (i) Maharashtra and (ii) Gujarat are being shown from April, 1961. Pondicherry has been adopted as a maritime block for the purposes of coasting trade statistics with effect from the same date. Besides Goa, Daman and Diu is being treated as a separate maritime block in coasting trade with effect from April. 1963. Again Daman and Diu are being included under Gujarat with effect from April, 1964.

In pursuance of Government orders coastal trade statistics are being compiled from daily trade returns received from the ports open to coastal trade on imports basis, with effect from April, 1964. Export figures are being derived from import data, as imports into one port represents the exports from other ports. Statistics relating to treasure is however being compiled on old basis i.e., from import and export returns submitted by each maritime block,

The figures show generally the trade as declared in the shipping documents duly scrutinised and passed through the customs houses. The term 'Indian merchandise' comprises all goods which are of the growth, produce or manufacture of India. Indian merchandise is distinguished from foreign merchandise in the declarations made by importers or exporters in the bills of entry or shipping bills from which the trade statistics Passengers' baggage, postal articles and merchandise are compiled. transhipped at Custom ports are excluded from the scope of these statistics. Imports and exports of treasure which include gold coin as well as bullion and silver (current coins) only are recorded separately and are not included in the figures of merchandise. Transactions in silver (other than current coins) have been included in merchandise with effect from April, 1961. From 1st April, 1948, the distinction between private merchandise and Government stores has been abolished and combined figures of trade under both these categories are published.

In the values of articles imported or exported as recorded in the coasting trade, customs and excise duties previously paid are included.

The year refers to the period of twelve months, April to March. From

1958 figures were compiled on calendar year basis.

The financial year basis has been re-adopted with effect from April, 1960.

### (C) INLAND TRADE

### Table 87

Nature and scope—Inland Trade Statistics represent the movement of Trade by railways and one steamer service, from and into a State taken as a whole or a chief port or ports, the trade of which is registered separately from that of the state in which such port or ports may be situated. Movement of trade by other means (e.g. road, air, country boats etc.) is thus excluded from the scope of these statistics.

Trade Blocks—Prior to April, 1962 there were 29 Trade Blocks. The list has since been amplified with a view to taking into account the bifurcation of the erstwhile Bombay State into Gujarat and Maharashtra. It was further amplified in April, 1965 to provide for seperate formation of Nagaland. For the purposes of the accounts, and as from April, 1965, India is divided into 32 Trade Blocks, representing the States and Centrally Administered Territories of Indian Union as constituted under the States Reorganisation Act, 1956, Bombay Reorganisation Act, 1960, and the state of Nagaland Act, 1962, Pondicherry, Karikal and Goa except Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra, Mysore and West Bengal which have been constituted into more than one Trade Block.

Method of Registration—The figures for April, 1965 onwards represent actual exports from each trade block. According to arrangement in force, each of the railways and the steamer company register such traffic as is despatched from stations on its line within a particular trade block to other trade blocks. Prior to April, 1965 these figures were recorded on 'imports' basis. In case of Tripura, however, there is no railway or steamer station or out-agency within the trade block, and special arrangements have been made to record the trade. The trade of this block is recorded by the following agencies:

- (i) in respect of trade via Eastern Bengal railway by five land customs stations on the Tripura Eastern Pakistan border;
- (ii) in respect of trade via Patharkandi station on the Assam-Tripura border, by the North East Frontier Railways.

River borne trade—The statistics upto the period ending August, 1965 cover only the trade carried only by the River Steam Navigation Co. Ltd. between the Trade blocks mentioned below. No account is taken of (a) trade carried by other steamer owners or boat-owners between these trade blocks or (b) river borne trade between other trade blocks.

- (1) Calcutta.
- (2) Assam.
- (3) West Bengal (excluding Calcutta).

For the purposes of registration, trade originating in a railway and transhpped, under through-booking arrangements, at a railway station to a steamer for conveyance to a river station, is treated as carried wholly by rail. The above company, however, suspended its steamer service from September, 1965. Thus the statistics relate only to rail-borne trade from September, 1965 onwards.

Articles and Units of measurement—The trade in certain staple articles only is recorded and the weight recorded is the net weight *i.e.*, the gross weight entered in the invoices less certain fixed percentages which have been taken to represent the weight of packing etc. Values are not recorded. Figure of oil-seeds represent the trade in the following varieties: (i) Castor, (ii) Cotton seed, (iii) Ground nut, (iv) Linseed, (v) Rape and mustard, (vi) Til or finjili. Cotton piece goods include both Indian and foreign cloth. Jute raw includes both loose and pucca bales. Raw cotton figures do not make distinction between ginned and unginned.

Period —Figures relate generally to the financial year April-March but in the case of raw cotton figures relate to the year September-August.

The figures shown against this item are the net and gross terms of trade respectively. The former is the ratio of overall export unit value index to similar import index and the latter the ratio of overall import quantum index to similar exports index.

(2) "Cotton (raw and waste)" split up "into 'Raw Cotton other than linters' and 'cotton waste' from October, 1962.

¹⁹⁶⁶ indices have been split up into two parts, one for pre-devaluation period and another for post-devaluation period as the figures for thesetwo periods are not comparable.

Note: - Figures compiled on calendar year basis for the year 1959 and on financial year basis with effect from April, 1960.

⁽¹⁾ Includes Maharashtra and Gujarat.

⁽²⁾ Gos Daman and Diu were treated as a separate maritime block in coastal trade with effect from April, 1963. Subsequently from April, 1964 Daman and Diu are included under Gujarat.

⁽a) Distinction between Indian and Foreign Merchandise has been abolished with effect from April, 1964

⁽b) Figures are incomplete.

Shares of imports of Maharashtra and Gujarat are 66,28,43 and 19,78,10 respectively and those of exports are 70,22,87 and 27,74,10 respectively.

Calcutta

The balance of payments is a record of economic transactions of the residents of a country with the rest of the world on account of goods exported and imported, services rendered and received and transfers of capital. Residents cover nationals as well as non-nationals residing in the country. Foreign students, tourists, foreign diplomatic officers and international institutions are not considered to be residents but diplomatic officers and armed forces of the country, stationed abroad, are treated as residents notwithstanding their physical location.

India's balance of payments statistics presented in this section are derived for the most part from exchange control records. The figures relate to Indian Union and include Indo-Pakistan transactions also.

Tables 88 & 89

Current Account,—Economic transactions that enter the current account of the balance of payments are of the following types. A surplus on current account leads to an acquisition of assets or re-payment of debts previously contracted and a deficit involves withdrawal of previously accumulated assets or is met by borrowings.

Merchandise—The figurers refer to recorded transactions and include estimates of unrecorded imports paid with Indian currency notes but exclude transactions under Government barter deals. Imports are inclusive of insurance and freight although these two elements come, strictly speaking, under the category of services. Exports are f.o.b. Gold transactions are recorded separately under the head "non-monetary gold"

Transportation—Receipts include charges, etc., met by foreign ships in Indian ports, while payments cover operating expenses abroad of Indian steamship companies and some freight payments.

Investment income—Receipts include interest and discount on the investments of the Reserve Bank of India.

Government not included elsewhere—The payment figures represent disbursements of the Government such as those for the upkeep of its offices abroad as also contributions to international organisations.

Miscellaneous—This item covers, in the main, receipts and payments for services such as those for agency services and film rentals and maintenance of estates.

Donations —These are mainly unilateral transfers like gifts, maintenance allowances, family remittances and remittances received by missionaries. Also include aid received under Colombo Plan and Indo-U.S. Technical Co-operation agreement.

Errors and Omissions—This is a reconciliation entry to balance the difference in the total debits and credits. These differences arise due to difference in timings between the two arms of a transaction or their coverage.

#### 2. Capital Account:

This account indicates how the transactions under the current account affect the country's investment position abroad. Explanations of the various categories included are given below:—

- 1. (a) Private Long-term Capital—Transactions covered are mainly cash transfers and do not include investments in the form of goods brought from abroad or the re-invested earnings of foreign controlled companies in India.
- (b) Private Short-term Capital—Mainly includes seasonal capital received from abroad for financing foreign owned plantations and net charges in the short-term indebtedness or claims abroad of business institutions.
- 2. Banking—This excludes transactions by Reserve Bank of India, Figures are available only from 1957. Earlier data is included under official. Figures for 1957 are incomplete to the extent that, certain banking sector liabilities to non-resident government institutions, are included under official sector for want of details.
- 3. Official (including R.B.I.)—Comprise (a) Loans—Credit side includes drawings on various loans and credits obtained by the country, viz., I.B.R.D. loans, U.S. Export-Import Bank & D.L.F Loans, Japanese Yen Credit, U.K.—India oil pipeline credit, credits arranged for industrial enterprises and Barauni Refinery, West German credit for capital goods loans under U.S. Government's P.L. 480 and P.L. 665 programmes, etc. Debit figures include repurchases of rupees from the I.M.F. and extension of loans to Burma.
- (b) Amortisation—The debit-side includes repayments of I.B.R.D., D.L.F, T.C.A. loans and Bhilai Credit. The credit entries relate mainly to repayment by the U.K. of the Excess Pensions Fund.
- (c) Miscellaneous—Include changes in the P.L. 480 and P.L. 665 balances and rupee liabilities of the Reserve Bank of India to non-resident official and semi-official institutions.
- (d) Reserves—Cover changes in foreign exchange assets of the Reserve Bank of India and the Government.

Figures for 1951—1956 of the Banking Sector are also included under the official sector for want of details.

Regional Balance of Payments—Gurrent Account—This table provides data on the regional aspect of the current account. The area-wise division of current transactions shown is based on definitions of these areas current during the various periods concerned as detailed below;—

Sterling Area—All Commonwealth countries (excluding Canada and Newfoundland) together with Burma, Jordan, Libya, Muscat & Oman, Irish Republic and Iceland.

Dollar Area—Covering United States of America, Canada (including Newfoundland), Cuba, Haiti, Dominican Republic, Puerto Rico, Virgin Islands of the United States, Mexico, Guatemala, Honduras (not British), Salvador, Nicaragua, Costa Rica, Colombia, Republic of Panama, Panama Canal Zono, Venezuela, Ecuador, Bolivia, Hawaii, Phillippines, Liberia and American Samoa. Figures for 1951 and 1952 refer to "Hard Currency Area" comprising the United States of America, other American Account Countries, Canada, Liberia, Argentina and Japan. The last two ceased to be hard currency countries from January 1951 and October 1951, respectively.

O.E.C.D. Countries.—Covering Sweden, Norway, Denmark, West Germany, Netherlands, Belgium, Luxembourg, France, Portugal, Switzerland, Italy, Austria, Greece, Turkey and Spain.

Tables 90 and 91.—These tables show at a glance the aid received from all sources upto March 31, 1967.

Source ; Reserve Bank of India. (r) Cover for April 1962 to March 1963 merchandise transactions and thereafter all transactions

relating to Gos, Diu and Daman. (2) Beginning with April-June 1965 the data on Government imports exclude freight on P.L. 480 imports initially borne by India but subsequently refunded by U.S. authorities.

⁽³⁾ Since April 1965 the data for receipts exclude refund of freight on P.L. 433 imports initially borne by India but subsequently refunded by U.S. Authorities.

⁽⁴⁾ Since April 1964, the nomenlacture of this item has been changed to "Transfer Payments' and as of the same monthgrants received under title II and III of the P.L. 480, which were formerly classified as "Official donations have now been shown under Private Transfer Payments (Receipts). Secondly receipts and payments of pensions on government account are shown under 'Official Transfer Payments' and those on private account under 'Private Transfer Payments'.

⁽⁵⁾ Data for receipts for the year 1965 and thereafter are incomplete.

⁽a) Includes Rs. 8.3 crores in 1964 and 1965 and Rs. 13.0 crores in 1965 paid to I.B.R.D. as our contribution to the Indus Basin Development Fund under the terms of Indus Water Treaty signed on September 19, 1960.

⁽b) Beginning with the quarter October-December, 1965, the basis for recording of the exports data was changed from shipments approved during a month to actual shipments in respect of which documents were negotiated during a month.

^{*}The rapec equivalent of all foreign currency transactions upto May, 1966 has been arrived at by applying the pre-devaluation of those during the subsequent period by using the current exchange rates.

Tables 92A-98

Route-Kilometres of the Railways.—In calculating the length of route double or treble lines are counted only once.

Gross Earnings and Working Expenses.—Represent total earnings and expenses of railways in an accounting period irrespective of whether the earnings have been realised or expenses paid. Gross earnings include all earnings from passenger traffic, goods traffic, parcels, luggage and other miscellaneous sources of revenue, while working expenses include all expenses incurred for maintenance of structural works, supply of loco power, carriage and wagon stock, ferry steamers and harbours as well as the expenses of traffic departments, general and electric service departments and other miscellaneous expenses.

Train Kilometres.—Include the kilometres run by trains carrying passengers or goods or both as well as the kilometres run by empty trains. No deduction is made for departmental trains.

Number of Passengers and Metric Tons carried.—In Table No. 92A the figures represent the number of passengers and weight in metric tons of goods originating on all Railways, while in Table No. 92B they represent the total number of passengers and total weight in metric tons of goods carried on individual railways. In the latter case, passengers travelling over two or more railways or two or more gauges of the same railway are treated as having performed two or more journeys. The figures relating to metric tons of goods carried are also recorded in the same manner.

Passenger-Kilometres and Net Metric Ton-Kilometres.—The figures under these heads are the real indices of the volume of passengers and goods traffic handled. These are arrived at by multiplying the total number of passengers carried and the total metric tons of goods carried by the respective number of kilometres over which they are moved.

Accidents.—The figures exclude persons killed or injured in rail-way workshops.

Class/pre-April 1955 and class.

⁽¹⁾ With effect from 1st April 1955 the pre-existing First Class was abolished and the Second and Inter Classes are re-named as First and Second Classes respectively.

⁽²⁾ These figures represent the number of passengers and metric tons of goods originating on all railways and are not the total of figures shown in the later table relating to number of passengers and quantity of good searried and the earnings derived therefrom by Railways which represent total number of passengers and good scarried on individual railways

⁽³⁾ and class/pre-April 1955 Inter class.

⁽a) Pre-April 1955.

⁽a) Bucludes figures for Bengul, Provincial, Jagadhri and Baraset-Basirhat Light Railways.

Table 99 :--

Number of Motor Vehicles taxed during the last quarter of the year—The figures shown in the table may be taken to represent the bulk of the serviceable vehicles.

Table 100 :--

State Revenue from Road Transport—The State Governments, in addition to motor vehicle Taxes and Fees, levy sales tax on motor spirit and tax on passenger and goods carried. The Sales Tax on motor spirit is levied at varying rates under varying conditions in the different States. In some cases, the levies on Motor Spirit are made under the General Sales Tax Act and in other cases under Special Motor Spirit Sales Tax Act. Taxes on passengers and goods carried by road or on inland water-ways under entry 56 of List II of the Seventh Schedule of the Constitution are levied in Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, West Bengal and Himachal Pradesh.

Tables 101 and 102 :--

Revenue from State Motor Vehicles Taxes and Fees in India—Direc taxation of motor vehicles in India is a State subject. Taxes are levied under various State 'Taxation Acts' and the basis and incidence of taxation vary from State to State. Fees are levied under the Motor Vehicles Act, 1939, which is a Central Act and Motor Vehicles Rules framed by the State Governments thereunder. These include (a) fees for issue and renewal of driving licences, issue of duplicate licences, tests of competence to drive and (b) others which include fees for issue of registration certificates and duplicates thereof and issue of permits for operation of transport vehicles. Annual figures are compiled from returns, in prescribed forms, received from various States in pursuance of a decision taken at a meeting of the Transport Advisory Council held in 1939.

Table 103:-

Transport Undertakings of various States—Almost all the major States of India have accepted nationalisation of bus services as a basic policy and many have nearly taken over the entire private bus transport in their area, with view to ensuring autonomy and efficient administration. The nationalisation of road transport is mostly confined to the passenger traffic so far.

#### Tables 104&105

Length of Extra-Municipal Roads (classified according to surface).—The figures are compiled annually from the returns, in the prescribed forms, received from various States according to recommendations of the Conference of British Commonwealth Statisticians held in Ottawa in 1935. These statistics relate to extra-municipal roads maintained by public authorities, i.e., roads outside the area or jurisdiction of a Municipality, Town or City Corporation or other urban body. These roads are maintained by (a) Public Works Department and Military Engineering Service and (b) Local Bodies. The Roads maintained by the M.E.S. are generally in Cantonments where the M.E.S. are the executing agency for P.W.D. These returns do not include military roads but they include roads, classed as national highways. In addition to these there are also roads constructed in the Community Development and National Extension Service Blocks which came into existence after 2nd October, 1952, and public roads in urban areas in different States of India. Separate tables giving the length of public Roads in urban Areas as on 31st March, 1962 is included. Various types of roads, classified according to surface, are defined below :-

Bituminous roads have surface dressing with tar, bituminous or as phalt including grounding sheet asphalt, etc.

Concrete roads include surfaces dressed with cement concrete or cement bound mecadam.

Water bound mecadam roads have surfaces of broken rock metal kankar, laterite or brick metal.

Lower type roads are unmetalled roads of artificially admixed granular material or natural soil-motorable and unmotorable.

National Highways are highways running through the length and breadth of the Indian Union connecting major ports, foreign highways and capitals of States and include roads of strategic importance, thus constituting the main arteries of communication in the country. The system of National Highways came into existence on 1st April, 1947 from which date the Government of India assumed complete financial liability for maintenance and development of roads included under the system. The National Highways Act, 1956 laid down that the Government of India is responsible for developing and maintaining all the National Highways; but they may direct that any function in relation to development and maintenance of any National Highway

Roads 291

shall also be exercisable by the Government of the State within which the National Highway is situated or by any officer or authority subordinate to he Government of India or to the tate Government.

#### Table 106-

Central Road Fund Statistics.—The Central Road Fund came into being in 1929-30, on the recommendations of the Jayakar Committee. The fund was built up out of an additional tax of two annas (now 2½ annas) a gallon on motor spirit. A part of the fund (now one-fifth) has been reserved for works or special or all-India importance, the balance being allocated to the States for approved works. The basis of allocation has been determined by the ratio of the consumption of motor spirit in each administrative unit. The fund is non-lapsing but the credits are subject to the annual vote of the Parliament. The Central Reserve was originally fixed by the Legislature in 1930 at 1/10th of the Central Road Fund. It was subsequently raised to 15 per cent in 1937 and 20 per cent in 1949. Data Relate to the Indian Union.

TABLE 104-EXTRA-MUNICIPAL ROADS (CLASSIFIED ACCORDING TO S. R-FACE) INCLUDING NATIONAL HIGHWAYS MAINTAINED BY P.W.D & LOCAL BODIES AND CONSTRUCTED ROADS IN C.D. & N.E.S.

#### 20. SHIPPING

Tables 107 to 116:--

Indian shipping statistics are confined to foreign and coastal traffic only; data for inland shipping being far too meagre at present. Number of ships include their repeated voyages, i.e., if a ship performs more than one voyage, it is treated as more than one vessel. Tonnage recorded except in table 112 is net tonnage, i.e., volume of enclosed spaces of vessels less crew space, engine room and other space not used for cargo; and the unit of measurement is a ton of 100 cu. ft.

Figures for sailing vessels include only square rigged type while those which are not square rigged are taken as country craft. Figures for country crafts are not separately recorded from April, 1955.

Vessels in foreign trade are recorded as entering on the voyage inwards at the first Indian port and as clearing on the voyage outwards at the last Indian port at which cargo is laden. If on their inward voyage, they enter a port in India in ballast or to discharge a part of their cargo and then proceed to other ports in India, their clearances and entries after the first port are recorded in the coasting trade. Similarly if vessels, on the voyage outwards, are loaded with part cargo for a foreign port and part for some other port or ports in India, they are recorded at the first port of departure as cleared in the coasting trade and again recorded as cleared in foreign trade at the last Indian Port. The arrivals of vessels at port in India for the purposes of discharging cargo and their departure from a port in India after loading cargo are recorded as arrivals or departures with cargo

The arrival of vessels at port at which no cargo is discharged and departure of vessels from ports at which no cargo is loaded are recorded. respectively as arrival and departure in ballast.

Note:—The above data covers six major ports of India viz., Visakhapatnam, Calcutta, Bombay, Kandla, Madras and Cochin,

Source: Annual Administration Reports and Special Returns collected from the Major Ports.

⁽¹⁾ Up to the year 1961-62 figures exclude Kandla port for which Flag-wise break-down, separately for coastal and foreign trade is not available.

⁽²⁾ Figures for Sailing Vessels by Nationality not available.

⁽³⁾ Figures less than 1,000 tonnet.

#### 21 CIVIL AVIATION

#### Tables 117A & 117B

The statistics relate to revenue traffic carried by Indian airlines on their scheduled services. Data for domestic and international Services, have been shown separately. For ensuring international comparability of data, the standards laid down in the International Civil Aviation Organisation (I.C.A.O.) have been adopted for categorisation of scheduled traffic. The new series have been worked out giving separate statistics for the domestic services and international services. Hereafter, 'Domestic Services' would include only those services which are operated in India and services operated to the neighbouring countries would be excluded. Because of its little economic significance, the compilation of data pertaining to non-revenue load carried has, been suspended since 1961. Hence the column on this has been deleted from the new series published hereafter.

Further details are as below: -

Hours flown—These figures represent the total number of hours flown by individual planes.

Kilometres flown—These figures represent the total kilometres flown by individual planes.

Capacity metric ton-kilometres—The figures are obtained by multiplying the total tonnage offered to the public for air transportation of passengers freights and mails by the kilometres flown.

Passengers, freight, mails and newspapers carried—The number of passengers carried represents the total number of passengers carried on different air-routes treating passengers travelling by planes for two or more routes as having performed two or more journeys. The figures relating to the weight of freight and mails carried are also derived in the same manner.

Passenger kilometres—The figures are obtained by adding up the kilometres travelled by each passenger.

Load metric ton-kilometres—Represents aggregates based on the product of the tonnage of freight or mails, as the case may be, and the distance through which the load was carried. The figures relating to total load-metric ton-kilometres take into account all kinds of traffic, including passengers.

#### 22. TOURISM

TABLE 118

Foreign Tourists coming to India

Tourist traffic covers persons visiting India for a period of not less than 24 hours and not more than six months, for business, holiday, pleasure, in transit, study, reasons of health, domestic reasons, attending meetings or in a representative capacity of any kind, e.g., scientific, administrative, religious, athletics. The term "tourist" excludes migrants, persons who come for employment, transport crews, troops, etc. Visitors coming from Pakistan, Sikkim and nationals of Nepal and Bhutan entering India through land routes are not included in this table. The tourist traffic has been classified according to the countries of nationality of the tourists.

⁽¹⁾ The area—Nyasaland—Rhodesia—was divided in to Malawi (formerly Nyasaland) Zambia (formerly Northern Rhodesia) and Southern Rohdesia in 1965. Hence figures for these areas are compiled separately from 1965 Onward.

⁽a) Since 1965. Tanganyika & Zanzibar have been united forming Tanzania.

⁽³⁾ Since 1962. U. A. R. consisted of only Egypt and U.A.R's figures are given under Africa since 1963.

### Tables 119 to 133

This section presents operating and financial data relating to the different branches of the Posts and Telegraphs Department, including the Post Office Savings Bank. They comprise statistics of the number of offices and the length in kilometre of telegraph lines as well as the volume of traffic handled by those offices and/or sent over the wires. It is possible with these data to make a study of the growth of traffic against the background of expansion of facilities and vice varsa.

Receipts under postage (table 124) include both sale of stamps and postage paid in cash, e.g.,—(i) postage prepaid in cash in post offices, (ii) credits afforded in the schedule of customs duty on account of postal redirection fees and insurance fees realised on delivery of inward foreign parcels, (iii) charges for resetting franking machines, and (iv) cash realised for unpaid or insufficiently paid postal articles. Statistics relating to Telegraph offices (table 127) maintained by the department independently or in conjunction with another office or by a licensed administrator have been included. Statistics of registered articles are actuals. In the case of unregistered postal traffic (letters, postcards, parcels, packets and newspapers) it is not possible to maintain day-to-day statistics of the actual number of articles. Unregistered traffic is, therefore, estimated from a count of the articles in all post offices in India taken during one week in the busy season and one week in the slack season.

Radio telegraphs (table 131) include only nessages sent to ships from coastal offices

#### 24. LABOUR

This Section presents data in respect of employment, wages and earnings, industrial disputes, industrial injuries and labour training. Details are given below—

### Employment-

Attempts have been made in this section to cover statistics regarding employment both under the public and private sectors as far as figures are available. Tables 134 and 135 give a complete picture of employment in public sector.

## Table 134

This table relates to establishments under Central Government, State Governments, Quasi-Government and Local Bodies. The information is based on the data collected by the Employment Exchanges as part of a programme for collection of employment market information on quarterly basis.

### Table 135

This table relates to employement in Railways. As the regrouping of Government Railways was completed on 14th April 1952, Zone wise information regarding employment in Railways is available only from that year. Information regarding employment in Works and Projects includes Chittaranjan Locomotive Works, Ganga Bridge Project and Integral Coach Factory from 1955 and Railway Electrification Project from 1966 onwards. Besides, employment data for Non-Government Railways and for Railway Board and other Railway offices are also given in this table. The employment data include class I to IV permanent and temporary employees.

## 136A & 136B

Statistics relating to employment in factories are collected under the provisions of the Indian Factories Act, 1948. The coverage under Act extends to all factories employing 10 workers or more with the aid of power and 20 workers or more without the aid of power. The State Governments are also empowered under Section 85 of the Act to notify factories which are not covered by the wto groups of factories mentioned above. The statistics presented in the tables include information relating to such factories also. The employment figures represent "average daily employment". The figures of Average daily employment are furnished by each factory by dividing the total attendances (man-days) during a year by the total number of working days during the year. Thus the measure of employment is based on attendance and not on the physical number of persons on rolls. Coverage by States of the data presented in these two tables is given

344 LABOUR

#### Table 136A

The data upto 1955 relate to the former Part 'A' and Part 'C' States. Data from 1955 onwards relate to re-organized States and Union Territories. Data for 1957 exclude Manipur and those for 1958 exclude Mysore. Data from 1956 to 1962 is exclusive of Jammu & Kashmir. Data from 1956 onwards include estimated information relating to average daily employment in factories not submitting returns whereas, previously these related to only factories submitting returns. The data are therefore not comparable from year to year. For 1956 onwards figures, have been demarcated by a deep line in order to indicate non-comparability.

#### Table 136B

State-wise details regarding number of factories and average daily number of workers employed in each industry during the year 1964 are given in this table. Annual totals for each State are also shown from the year 1951. The all-India totals upto 1955 relate to all former part 'A', 'B' & 'C' States. Totals from the year 1956, relate to reorganized States. The scope and limitation of data are same as mentioned in respect of table 136A.

### Table 137

Average daily employment in factories according to three broad agegroups and sex is shown in this table. In the Indian Factories Act, 1948, the following changes were made in the definition of adult, adolescent and child, as compared to the Factories Act, 1934.

	Under the old Act	Under the new Act
Adult	One who has completed 17 years.	One who has completed 18 years.
Adolescent	One who has completed 15 years but not 17 years.	One who has completed 15 years but not 18 years.
Child	One who has not completed 15 years (children below 12 years not permitted to work).	One who has not completed 15 years (children below 14 years not permitted to work).

## Table 138

Information regarding average daily number of workers employed in all mines (total) and in 15 important mines individually is given in this table. The method of computation of average daily number of workers employed is the same as given above for table 136 A & B. Under the statutory provision of Mines Act the Director General of Mines Safety collects information regarding number of persons employed in mines and quarries (except those specially exempted by Central Government). Upto 1953 the information regarding employment in mines was collected under the Indian Mines

Act, 1923 and thereafter it is collected under the Indian Mines Act, 1952. The scope of the Act changes slightly from time to time. For example by a Notification of March 1955, a number of hitherto exempted stone, lime stone and sand excavations were prought under the provisions of the Act.

#### Table 139

This table shows the average daily number of persons employed in tea, coffee and rubber estates. The Directorate of Economics and Statistics, Ministry of Food, Agriculture, Community Development and Cooperation collects figures of employment from coffee and rubber estates every year through State Governments. The data for employment in Tea plantations is based on the publication 'Tea Statistics' published by Tea Board, All workers in garden and outside, are covered. According to instructions laid down, each estate furnishes figures of 'average daily employment' by dividing the total man-days worked during a year by a standard figure of 300 working days. The figures of 'average daily employment' for individual estates are added up to obtain the 'average daily employment' for each industry viz., tea, coffee and rubber

#### Table 140

Statistics of employment in respect of shops, commercial establishments and restaurants, registered under the Weekly Holidays Act 1942 or Shops and Commercial Establishments Acts in the various States are given in this table. These Acts are in force only in certain urban areas, covering municipal areas, towns and cantonments, and hence the statistics are limited to shops and commercial establishments in such areas. No provision for collection of information regarding the number of shops, commercial and employment therein exist establishments etc. concerned Act for Uttar Pradesh and therefore, such details not available in respect of Uttar Pradesh. Further, there is regular arrangement for collecting annual returns on employment from the individual units covered by the Acts and the employment data collected specially by the State Governments at the request of the Labour Bureau. In some cases, the employment data were compiled from the figures furnished by the employers at the time of registration of the unit under the Act and in other cases they were collected specially by the Inspectors appointed under the Acts directly from the individual establishmen's. The Inspectors generally estimated the number of persons employed and it does not appear that any uniform measure of employment, e.g., "average daily employment" for a period or "number on rolls" on a particular day was adopted. In certain cases, the number of shops may be more than the number of workers employed therein due to the fact that shops not employing any worker but run independently by the owners themselves are also covered by the Act.

#### Employment Service-

Statistics in this sub-section show the working of the Employment Exchanges under the control of the Directorate General of Employment and Training, Ministry of Labour, Employment and Rehabilitation. The nature of work undertaken by the Employment Exchanges consists of registering people who are seeking employment and securing employment for them.

Table 141

This table shows the number of applicants on the live-register of Employment Exchanges, according to the broad occupational groups, from year 1960. From 1960 the information regarding applicant is collected for revised occupational group.

#### Table 142A & 142B

These tables show the number of applicants placed in employment through the employment exchanges according to the nature of service and placements of certain special categories of applicants.

Wages and Earnings of Factory Employees-

Tables 143A—145B

The statistics are collected under the Payment of Wages Act, 1936 and relate to factories defined under clause (m) of Section 2 of the Factories Act, 1948. Earnings include Basic Wages, Dearness Allowance, overtime payment, other cash allowances including production or incentive bonus, efficiency bonus, money value of concessions, annual or profit bonus and arrears. The statistics are based on factories reporting and hence are subject largely to errors of varying non-response from year to year.

Prior to 1st April 1958, the Payment of Wages Act, 1936 applied to employees earning less than Rs. 200 per month. With the enforcement of the Payment of Wages (Amendment) Act, 1957, with effect from the 1st April, 1958, the scope of the Act has been extended also to cover persons earnings Rs. 200 or more but less than Rs. 400 p.m. Ever since efforts have been made to collect the relevant information according to the extended scope of the Act. However, acceptable returns for these employees were received only with effect from 1931 and the information relating to both the wage groups i.e. employees earnings less than Rs. 200 p.m. and less than Rs. 400 p.m. was published upto 1964. The returns for 1965 and onwards are being obtained for one wage group only, i.e. 'less than Rs. 400'. The data presented in Table Nos. (143A, 144A and 145A) relate to persons earning less than Rs. 200 p.m., whereas the data in Table Nos. 143B, 44B and 145B relate to persons earning less than Rs. 400 per month.

The figures given in Table Nos. 143A and 143B exclude Railway Workshops but include Defence Installations. The figures relating to groups of industries that are seasonal in character comprising food, Beverages, Tobacco and Gins & Presses, are excluded from those presented in Table Nos. 144A, 144B, 145A and 145B.

While computing the figures of average annual carnings, the groups of industries consisting of Food beverages, Tobacco and Gins and Presses have been excluded as these groups contain mainly seasonal factories where the annual earnings of workers rarely relate to a whole year and therefore would not be comparable with the data on earnings, in the case of perennial factories. Railway workshops are also not covered in these statistics.

#### Table 146

Information regarding per capita average monthly earnings of Tea plantation labourers in Assam is given in this table. For the purpose of these statistics a labourer is defined as a person working on wage not exceeding Rs. 50 per month (excluding a clerk domestic servant or a mechanic, carpenter, mason, brick-layer or other artisan). The figures are based on Tea estates submitting returns. The coverage is, therefore, incomplete and varies from year to year. The figures in respect of the years prior to 1953-54 are based on two months average (March and September) whereas those for 1953-54 and later years are average of the 12 months of the respective year.

#### Table 147

The data for coal-mines relate to average weekly earnings in December each year, whereas those for other mines relate to average daily earnings in December each year. The average weekly cash earnings in coal mines are computed by dividing the total payments during the first complete working week in the month of December by the average daily attendance during the week. The average daily earnings for mines other than coal are computed by dividing the total payment for December by the corresponding aggregate daily attendance.

#### Table 148

This table shows statistics of injuries resulting from accidents in factories collected under the Factories Act, 1948. Data relate to all former Part 'A' States and Part 'C' States of Delhi, Ajmer and Andaman and Nicobar Islands upto 1955 and thereafter to the re-organised States and Union Territories. Data for 1956 relate to all re-organised States. Data excludes the States of Jammu and Kashmir, Mysore and Manipur from 1957 to 1958. Figures for 1959—52 do not include those for Jammu and Kashmir.

#### Table 149

This table shows number of accidents and number of injuries (i.e. number of persons receiving injuries) in Mines. The data are collected under the Mines Act. Accidents have been classified into fatal and serious. A serious injury is one which involves, or in all probability will involve, permanent loss and injury to sight or hearing and fracture of limb and enforced absence of the injured person from work for a period exceeding 20 days. Complete statistics of minor injuries are not available. Data for 1950 relates to Part 'A' States and Part 'C' States of Ajmer, Coorg and Delhi. Data from 1951 cover whole of the Indian Union except Jammu and Kashmir.

Industrial Disputes.—The figures relate to disputes resulting in work stoppages and involving ten or more workers. A temporary stoppage of work by a group or all employees in a unit or temporary withholding of work from

a group of employees, by an employer (or a group of employers) in a unit in connection with matters relating to employment or terms or conditions of employment is termed as an Industrial Dispute. As the statistics are collected on voluntary basis the coverage may not be complete particularly in sectors like construction, trade and services. The statistics cover both strikes and lock-outs but certain types of strikes like sympathetic strikes which are not connected with specific demands of workers are not included in the statistics Upto 1956 data in general relate to former Part 'A' states and Part 'C' states of Ajmer and Delhi. Territories merged with Part 'A' states during this period have gradually been covered. From 1957 the data relate to whole of the Indian Union.

#### Table 150

This table shows the State-wise distribution of number of disputes, workers involved and number of man-days lost on account of the disputes. The data are collected on a voluntary basis by the State authorities and consolidated returns are furnished to the Labour Bureau. The figures of number of workers involved relate to the maximum number of workers involved. The maximum number of workers involved is the number which was highest on any day during the course of work stoppage as known upto the date of reporting. The figures of man-days lost are calculated by adding up actual vacancies caused by the work-stoppage on each working day. Scheduled holidays during the period of work-stoppages are not taken into account in the calculation of man-days lost.

#### Table 151

This table shows the classification of industrial disputes by causes

#### Table 152

Under the Workmen's Compensation Act, 1923 compensation is payable to workers employed in scheduled employments and drawing less than Rs. 500 per month, for injuries due to accidents resulting in death or disablement for more than 3 days provided that it is not caused through the fault of the worker himself. As all the injuries are not compensated, the number of compensated injuries do not reflect the total number of injuries occurring. Further, many of the establishments covered by the Workmen's Compensation Act fail to submit returns and hence information regarding number of compensated injuries and the amount of compensation paid is incomplete. With these limitations the table shows compensation paid to workers involved in industrial accidents under the Workmen's Compensation Act and excludes compensation of injuries paid under Employees State Insurance Act. These limitations affect the trend and comparability of statistics of compensated injuries.

#### Table 153

This table shows progress of the labour training sponsored by the Ministry of Labour, Employment and Rehabilitation.

- (1) There may be slight differences in totals due to rounding, from 1956 onwards, the data also include the estimated employment for factories not submitting returns. Rough annual estimates of average daily employment for the missing states, factories not submitting returns are 31 thousands for 1956, 184 thousands for 1956, 184 thousands for 1958, to thousands for 1959, 9 thousands for 1960, 10 thousands each for 1961 & 1962 and 8 thousands for 1965.
- (2) Total factory employment relates to all former Part 'A' 'B' and 'C' States including Andaman and Nicobar Islands upto 1956 and thereafter in all reorganised States and Union Territories. The difference between column 2 and sum of columns 3 & 11 upto 1957 is attributable to non-availability of employment break lown by Government and non-Government factories for certain States as per footnote (3) below.
- (3) Figures upto 1955 relate to areas of the Indian Union corresponding to Part 'A' States of Indian Union including Aimer, Coorg, Delhi and Andaman and Nicobar Islands covered by the Factories Act 1948. Territories merged with part 'A' States covered gradually, but all former Part 'B' States and a few Part 'C' States, viz. Bhopal, Himachal Pradesh, Kutch, Manipur, Tripura and Vindhya Pradesh are excluded throughout till 1955. Later, figures relate to reorganised States and Union Territories. Figures for 1957 exclude Manipur and for 1958 exclude Mysore.
  - (P) Provisional.
  - (a) Data from 1956 onwards (except 1963 & 1964) are exclusive of Jammu and Kashmir State.
  - (b) Rough estimate of average daily employment in Mysore State was 35 thousands.
  - (E) Estimates arrived at by repeating the figures for the year 1964 in respect of Gujarat, Kerala, Madras. Uttar Pradesh and Himachal Pradesh as the returns for the year 1965 were not received in time.

#### (P)Provisional

- (1) Covers all employees drawing below Rs. 200 P.M. Excludes workers employed in Railway Workshops and in the industrial groups of Food, Beverages, Tobacco and Gins & Presson.
- (a) Please see foot nots on page 40%.
- (b) Excludes figures relating to the industry group Machinery except Riccircal Machinery.
- (c) Excludes figures relating to the industry Petroleum, Pumping Filling and Storages.
- (d) Excludes figures relating to establishments in the industry. Agricultural implements in the Public Sector and Wrapping, Packing, Filling etc. of articles under section am(I) other factories.
- (e) Excludes figures relating to establishment in the industry groups Textiles in the Public Sector and Products of Petroleum and coal in Private Sector.
- (/) Batimated.

Relates to training centres jointly financed by the Ministry of Labour, Employment and (D.G.E. & T) and State Governments.
 Includes women if any.
 Information under the Apprentices Act, 1961 is being collected with effect from 1964.

#### 25. TRADE UNIONS

Tables 154 to 158

Figures given in this Section are based on the annual returns relating to financial years received from the State Governments and Union Territories under the Indian Trade Unions Act, 1926. The Act applies to the entire Indian Union except Jammu and Kashmir, which has a separate Act known as the Jammu and Kashmir Trade Unions Act, 1950. The figures do not include Manipur, Laccadive, Minicoy and Amindivi Islands also in respect of which information was not received.

The statistics relate to only those unions which have been registered under the Act. It is not obligatory on trade unions to secure registration under the Indian Trade Unions Act. Even among registered unions, about 40 per cent of them fail either to submit their annual returns as required under the Act or submit defective returns to the State Authorities, which are left out from the consolidated returns furnished by the State Governments to Labour Bureau. The coverage of the statistics (e.g. membership, finances, etc.) is, therefore, incomplete and varies from year to year. Data regarding unregistered unions are not available.

The industrial classification according to which information is collected was revised since 1954-55. A further revision of the Industrial classification was undertaken in 1957-58. The enlarged industrial classification is being followed from 1960-61, onwards. The figures as given in Table 157 have been compiled for the (revised enlarged industry classification. Information is also shown separately for central-unions which operate at 'All-India' level and State-unions which are confined to States level for their activities.

TRADE UNIONS

N.B.—I. The figures do not include information for J. & K. and Manipur for all the years. The 1964-65 figures do not include Assam, Maharashtra, Mysore and Uttar Pradesh.

^{2.} Some of the figures have been rounded up in thousands, so the total sum of figures may not necessarily tally.

^{3.} Employers' Unions on register during 1962-63 in case of U.P. State were not known. Hence the number of Employers Unions submitting returns have been treated as number of registered unions in column (2) above. The number of Unions on register during 1963-64 in case of Mysore and Rajasthan States were not known. Hence the number of Unions on register flux the number of Unions on register to column (2) above in respect of these States. In case of Madras the membership figures of One employer Union have not been included in column (5) above as the membership was available as 37 mills.

^{4.} The income, expenditure and balance of funds figures in cols. (6), (7) and (8) respectively have been rounded up in lakhs, so the balance of funds figures in col. (8) may not necessarily tally.

⁽P) Provisional

⁽a) Excluding Rajasthan.

⁽b) Less than Rs. fifty thousands.

⁽c) Although 1950 Unions submitted returns, membership was available for 4930 Unions only and fund figures were available for 4918 Unions only.

### 26. PRICES

Statistics of wholesale prices are based mainly on reports received from government agencies and commercial bodies in important market centres. Information is available concerning almost all the principal commodities that enter into the trade of the country.

Table 159

Index Number of Wholesale Prices in India—This index is compiled by the Economic Adviser to the Government of India, Ministry of Industrial Development and Company Affairs.

From April 14, 1956 a revised index of wholesale prices with base 1952-53=100 is computed in place of the previous price-index with year ended August 1939 as base. While the previous index included 78 commodities and 215 industrial price quotations, the new index includes 112 commodities and 555 quorations divided into six main groups. The index is a weighted arithmetic mean of price relatives. The weights assigned to various commodities are based on marketed value of domestic produce and value of imports inclusive of duty. In regard to manufactures (intermediate and finished products) weights have been fixed according to gross value of products as obtained from Census of Manufactures 1948; as also taking into account the imports. Weight for electricity is based on energy sold by electricity undertakings valued at average all-India rates. Petroleum weights are based on consumption figures. The weights generally refer to the period The weight base is thus different from the comparison base. Datafor General Index (revised series) have also been specially converted to oldbase and shown side by side for comparison. Figures have been obtained on the basis: 100 of the revised series=380.6 (being the average for 1952-53): of the old series.

Table 160

Wholesale Prices of certain Staple Articles of Trade at Selected Stations: in India—In this table, price quotations of some important articles, included in the Index Numbers of Wholesale Prices have been given. Upto 1956, price quotations are those included in the old series: From 1957, however, a, few more quotations used for the revised index of wholesale prices have been added. Figures are given for several varieties in the case of most of the commodities but they generally relate to the chief market only in each case. Annual figures are averages of monthly wholesale prices prevailing in markets during the last week of each month.

Tables 161 & 162

Index Numbers of Consumer Prices—In the Second Five Year Plan, it was recommended that steps should be taken to initiate family living surveys for the revision of old series of consumer price indices at different centres. Accordingly, fresh family living surveys among working class population were conducted at 50 important factory, mining and plantation centres of the country during the period September, 1958 to August, 1959. These surveys were conducted on uniform basis at all the centres under the guidance of the Technical Advisory Council on Cost of Living Index Numbers. On the basis of these surveys Consumer Price Indices for 46 centres out of 50 have so far been published by the Labour Bureau and are presented in table 162. At the recommendation of the Technical Advisory Committee the calendar year 1960 was adopted as the base year. This has also been approved by the Central Technical Advisory Council on Statistics.

Since new indices are not yet available for all the centres the All-India Index is still being published based on the old series (27 centres). In table 161, index number of consumer prices (working class) with base shifted

430 PRICES

to 1949=100, for all-India and Madras are published. For a brief note on the scope, coverage and method of computation of the series, please refer to earlier issues of this publication. In table 162 the new series—Consumer Price Index Numbers for Industrial workers with base 1960 = 100, is published.

The weighting diagram for each new series of Index numbers for industrial workers is based on an average expenditure pattern of families (including single member families). All expenditure, as revealed by the family living survey, has been included in the weighting diagram except non-consumption expenditure. The expenditure on items not included in the index has been imputed to those included on considerations of similarity of price-trends.

Index numbers have been compiled on the basis of the Laspeyre's formula as weighted averages of price relatives, the weights being the relative expenditure. For details of the method of computation please refer to "A Guide to Consumer Price Index Numbers—Labour Bureau Pamphlet Series 2".

Representative markets at each centre have been selected for collection of prices on the basis of market enquiries. At the factory centres, arrangements have been made for periodical rent surveys in order to reflect six-monthly changes in house rent. On the basis of these surveys, the index of house rent will be revised twice a year. At the mining and plantation centres, houses are mostly provided free by employers and hence at these centres the rent index will be kept stationary at the base value. The prices of fruits and vegetables for a particular month of the current year are also compared with the prices prevailing during the corresponding month of the base year (1950) to correct for large seasonal changes in prices.

Table 163

Index Numbers of Security Prices—The index number of security prices is a general purpose index compiled by the Reserve Bank of India. These series have been revised with effect from the first week of April, 1953. The average for 1953, thus relates to 39 weeks, ending December. The base period has been changed from the calendar year 1938 to the financial year 1949-50 up to June 1957 where after the base period is 1952-53. The series have been further revised and the base period has been again changed from 1952-53 to 1961-62 with effect from November, 1965. For details regarding the revised series with base 1961-62=100, reference may be made to the article published in the October 1965 issue of the Reserve Bank of India Bulletin.

In compilation of index 578 scrips are included in current series. These scrips were selected from among those quoted on the Bombay, Calcutta, Madras, Delhi and Ahmedabad stock exchanges on the basis of importance of concerns to which they related and their activity in the market. The scrips were classified into four groups and sixty-one sub-groups. Weights allocated to each of them were proportionate to the total amount of loans outstanding, as on March 31, 1962 in the case of government and semi-government securities and to the market value of shares during the base period in the case of fixed-dividend and variable-dividend industrial securities. Indices are calculated from weekly average prices for the selected scrips. Average quotations of the scrips during the base year represent arithmetic mean of daily quotations for the whole year. Monthly and annual indices are similar averages of weekly figures

### 27. NATIONAL PRODUCT

The tables presented in this section give the estimates of net nationals product (i.e. national income) of India, obtained by applying inventory method to as many sectors of the economy as possible; the income method being followed for the remaining sectors. The earlier estimates of national income have been replaced by the revised series of estimates of national product for the years 1960-61 to 1966-67. The tables 164 to 166 included in this section present the revised series of national product giving the estimates of net national product at factor cost, known as 'National Income', at current and constant (1960-61) prices. The improvements incorporated in the revised estimates relate to modifications in the industrial classification of national product, presentation of estimates to the extent possible separately for organised and un-organised activities in the economy and estimation of gross and net product in each industry group, the incorporation of the 1961 population census economic data and the results of various: surveys and studies undertaken by the CSO and other agencies. The estimates at constant prices have been improved by identifying more explicitly various items of outputs and inputs for the purpose of building up appropriate indicators and deflators required for measuring the gross/net product in various industries. The 'preliminary estimates' for 1964-65 and 1965-66, and the 'quick estimates' for 1966-67 presented in these tables are based on partial material and are subject to revision. The methodology and estimation Procedure are explained in the Brochure on Revised Series of National Product for 1960-61 to 1964-65' and the 'Estimates of National Product (Revised Series) 1960-61 to 1966-67' issued by the Central Statistical Organisation.

Revised estimates for the years prior to 1960-61 are not yet a vailable. The conventional estimates which were presented in the previous issues of the Statistical Abstract have not been reproduced in this section.

#### Table 164:

The revised estimates of net national product at current and 1960-61 prices are shown in this Table.

### Tables 165 & 166

The revised estimates of net domestic product by industry of origin at current and 1960-61 prices are given in Tables 165 & 166 respectively.

#### 28. NATIONAL FINANCE

The tables contained in this section show (i) the overall budgetary position of Central as well as State Governments as available from the budget papers and (ii) the transactions on revenue account of Central Government and State Governments with individual details of actual cash receipts and disbursements as distinct from amounts due to or amounts payable, available from the "Combined Finance and Revenue Accounts of the Central and State Governments of India"

Table 167: The overall budgetary position of the Central Government showing figures for total plan periods for the First, Second and Third Plans together with actuals for 1965-66 and revised estimates for 1966-67 and budget estimates for 1967-68 have been given. Greater details of various items under Revenue Account and Capital Account have been given for similar period in sub-tables A and of table 167.

Table 168: The overall budgetary position of the State Governments showing figures for total plan periods for the First, Second and Third Five Year Plans together with actuals for 1965-66 and revised estimates for 1966-67 and budget estimates for 1967-68 have been given. Greater details of Revenue Account and Capital Account have been given for similar periods in sub-tables A and B of table 168.

Table 169: The table gives a summary statement of the revenue and the expenditure on revenue account of Central and State Governments. Revenue comprises proceeds from taxation and other receipts classed as revenue, excluding borrowings, small savings, foreign aid, etc. The expenditure met from the revenue is treated as expenditure charged to revenue. The net result of above transactions represents the surplus or the deficit for the year on revenue account. The table presents data for the Central Government and those States which correspond to the reorganized set up. Data for the year 1964-65 are provisional.

Tables 170-173: Detailed figures of receipts and expenditure on collection of customs, union excise duties, corporation tax and taxes on income other than corporation tax have been given for 1950-51,1955-56and1957-58 to 1964-65. Figures in tables 167-168 have been taken from Reserve Bank of India bulletin and those in tables 169-173 have been collected from the Office of the Comptroller and Auditor General. For details regarding the scope of each item of account for which data are presented, the publication 'List of Major and Minor Heads of Account, of the Central and State Governments, Receipts and Disbursements' may be consulted. Data for the year 1964-65 are provisional.

Source : Reserve Bank of India.

Note: Accounts provisional. Budget estimates for 1967-68 relate to those presented to the Lok Sabha.

Figures of receipts and expenditure given above differ from those in the Budget documents because receipts under certain items are teken on net basis.

- (1) Excluding States' share of excise duties and other taxes.
  - Including the effect of budget proposals.
- (2) Excluding the payment of States' share of excise duties and additional excise duties.
- (3) Excluding Treasury bill receipts.
- (4) Includes remittances, transfer of cash between England and India and Reserve Bank Deposits.
- (5) Mostly sold to Reserve Bank of India
- (a) Excludes conversion of ad hoc treasury bills of Rs. 300 crores into 4 per cent Loan, 1973 which was taken, over by the Reserve Bank in July 1958 and is not intended to be placed on market, but includes sales of Treasury bills of Rs. 25.5 crores through Public auction.
- (b) Excludes ad hoc treasury bills of Rs. 150 crores in 1959-60, Rs. 50 crores each in 1960-61, 1961-62 and 1962-63 and Rs. 75 crores in 1963-64 and Rs. 50 crores each in 1964-65, 1965-66 and 1966-67 (R.E.) funded in December 1959, January 1961, February 1962, December 1962, January, 1964, January 1965, February 1966, and February 1967 respectively.
- (c) Excludes an amount of Rs. 17-9 crores representing ad hors issued to the Reserve Bank for purchase of gold for part payment of India's forcessed subscription to I.M.F.
- (d) According to the Budget speech of the Finance Minister, the overall deficit is likely to turn out to be somewhat smaller at Rs 313 crores as a result of better tax revenues, increased safe proceeds of food-grains and savings under capital expenditure on Railways, etc.

Notes: The figures of total revenue and expenditure as given in the table differ from those, in the Budget papers at receipts from forests, opium and currency and mint etc. are shown on a net basis and States' share of Union exicse duties and additional duties of excise are excluded. Budget estimates for 1967-68 relate to those presented to the Lok Sabna. Owing to changes in accounting classification, the figures from 1962-63 onwards, particularly in respect of items VII, X, XII, and XVI are not comparable with those for earlier years. Figures under revenue and expenditure from 1957-58 include seif balancing items in respect of (1) grants under P.L. 480 and (2) Steel Equalisation (3) Emergency Risks (Goods and Factories) Insurance Funds from 1962-63.

- (3) Excludes forests, opium and States' share of Union excise duties and additional excise duties.
- (4) Comprises General Administration, Audit, Administration of Justice, Jails, Police, Tribal Areas and External Affaires; with effect from 1961-62, expenditure relating to Tribal Areas is adjusted under the relevant Major Heads closely connected with the object of the expenditure. From 1962-63, this includes Miscellaneous Departments of Administrative nature and Supplies and Disposals.
- (5) Includes appropriation for reduction or avoidance of debt. From 1962-63, these also include interest charges on Capital advanced to Commercial Departments like Railways, Posts and Telegraphs which were hitherto booked in the accounts in reduction of receipts.
- (6) Include provision for grants to States for G.M.F. Schemes, relief in natural calamities etc. From 1954-55, these items are transferred to miscellaneous expenditure under appropriate ministries: from 1961-62, these figures are shown against item XVII. Since 1957-58, it includes provision for transfer to the Special Development Fund of grants received under P.L. 480. From 1962-63 it includes Emergency Risks (Goods and Factories) Insurance Funds.
- (7) Includes certain grants to States; from 1961-62, these grants are shown against item XVII.
- (8) Comprise Irrigation and multi-purpose river schemes, ports and pilotage, lighthouses and lightship's scientific departments, education, medical, public health, agriculture, rural development, animal husbandry, co-operation, industries (and supplies up to 1951-62), aviation, broadcasting, civil works, postwar reconstruction, community development projects, national extension service, labour and employment, Overseas Communications Service and miscellaneous departments
- (9) Include grants-in-aid to States: all grants to States are grouped together under this item from 1961-62-
- (10) Comprises famine relief, stationery and printing, civil defence and pre-partition payments.

Note:— Figures of receipts and disbursements will not tally with those in the buget papers, as certain adjustments have been made here; accounts are provisional. Receipts and disbursements include a formal adjusting item in respect of loans assistance from the U.S. Government which is transferred to the Special Development Fund by debit to Capital Treasury bill receipts and miscellaneous items such as remittances etc. have been excluded from this statement.

- (1) Excluding 15-year Annuity Certificates which are included under Small Savings.
- (2) Figures are net.

- (5) Residual item.
- (6) Mostly sold to the Reserve Bank of India.
- (7) Include transfer of sale proceeds of American (Loan) Wheat Grants to States for development purposes, ports, contingency fund and payment to displaced persons etc.
- (a) Excludes the conversion of ad hoe Treasury Bills of Rs. 150 crores in 1959-60, Rs. 50 crores each in 1960-61, 1961-62 and 1962-63 and Rs. 75 crores in 1963-64 and Rs. 50 crores each in 1964-65, 1965-66 and 1966-67 [Revised Estimates].
- (b) The outstanding foreign loans (other than P. L., 480 loans) have been worked out after writing up the balances as on June 6, 1966 by 57.5 per cent consequent on the change in the par value of the Indian

⁽³⁾ Figures for the period April 1 1960 to June 30, 1962 relate to Five Year Interest Free Prize Bonds, 1965. Sales of these Bonds were discontinued from July 1,1962 and a new series called Premium Prize Bonds, 1963, was issued from January 1, 1963, to December 31, 1963 and Premium Prize Bonds, 1964 from January 1, 1964 to December 31, 1964. Since January 1, 1965 the Prize Bond Scheme has been discontinued.

⁽⁴⁾ Receipts comprise the sale proceeds of American (Loan) Wheat, wheat received under Colombo Plan assistance under Indo-U.S. Technical Assistance Agreement and other aid.

⁽¹⁾ Includes industrial fuels and other mineral oils from the year 1961-62.

⁽²⁾ Metals other than Iron and Steel, Silver and Block tin up to 1961-62.

⁽a) Up to the year 1963-64, these duties were credited under three Sub-heads in the accounts i.e. Sea customs, Land customs, and 'Air customs', but from the 1st April, 1964, the duties are being accounted for under the heads 'Imports, 'Exports, and 'Miscellaneous'. The figures for 1964-65 are, therefore, for Customs and not for 'Sea Customs'.

#### 29. INCOME TAX

Statistics presented in this section relate to the assessments on account of Income-tax, Super-tax and Surcharge made by the Income-tax Department. The figures refer to regular assessments made under the Income-tax Act and do not include demands raised for advance payment, provisional assessments or miscellaneous demands like penalties, warrant fees, etc. Figures of taxes represent the demand raised and not the collections actually made against those demands. The scope of the Income-tax Act was enlarged from 1950-51 by extending it to the whole of India except the State of Jammu and Kashmir. From 1954-55, this state is also included.

### Tables 174-175

These tables analyse the demand for income-tax and Super-tax according to the revised classification in regard to classes of assessees viz., (i) individuals, (ii) Hindu undivided families, (iii) unregistered firms and other associations of persons, (iv) registered firms, and (v) companies and other concerns assessable at company rates. This revised classification was adopted from 1953-54. The statements are designed to show the total tax demand (including surcharge) payable by assessees and net income left in their hands after payment of tax. The number of assessees shown are in respect of each assessment made on them and an assessee having more than one assessment made on him during the year is counted more than once. Figures for the latest year i.e., 1964-65 are presented separately by ranges of total income assessed and by States while all-India totals are given from 1954-55. The figures for the income tax-payable in case of All India (New Series) for the year 1964-65 have been shown separately under incometax, Super-tax and Surcharge while the tax-payable figures for Statewise (New Series) are the total taxes inclusive of income-tax, Super-tax and Surcharge.

#### Table 176

The table analyses the demand of income-tax during the year 1964-65 according to the source of income assessed and retunds and rebates allowed. The unclassified demand and retund are cases arising as a result of rectifications, appeals, revisions, etc. The number of assessees shown is in respect of each source of income. An assessee having income from more than one source is included under each one of the source from which the income is derived.

#### Table 177

Income from "Business and Professions" and tax thereon is analysed in this table. The classification closely follows the 1951 Indian Census Economic Classification and the Census of Manufacturing Industries.

#### 30. EXCHANGE, COINAGE AND CURRENCY

This section presents data on exchange and money rates, prices of bullion and government securities, coinage and currency.

TABLE 178

Money Rates in India—Money rates may be defined as the rates as which the various classes of banks in the country are prepared to discount or rediscount bills of exchange, to give loans and advances, or to accept deposits.

Reserve Bank of India:-

Bank Rate-The standard rate at which the Reserve Bank of India is prepared to buy or rediscount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act. In respect of advances from the Reserve Bank to Scheduled Commercial Banks, the entire borrowings of the Banks were charged at Bank rate till October 1, 1960, when a new system of quotas (based on each bank's statutory reserves) and differential lending (slab) rates was introduced. On September 26, 1964 this was replaced by another system under which the effective lending rate was linked to the net liquidity position of the borrowing bank, the rate rising progressively with the impairment of its net liquidity position. Advances under the Rupee Export Bills Scheme are, however, charged at the Bank rate subject to the condition that the borrowing bank will not charge commission, interest or discount on all rupee Export bills with it at a rate exceeding 1-1/2 per cent per annum above the Bank rate.

State Bank of India

Hundi Rate—Rate at which the State Bank discounts first class three months commercial bills.

Advance Rate:—Bank's Prime lending rate which regulates all interest rates for the various categories and classes of advances granted by the Bank.

Call Loan Rate—Basic advance rate at which the State Bank grants demand loans to scheduled commercial banks against Government securities. Call loans to co-operative banks against Government securities are granted at I rate lower than call loan rate to other commercial banks.

Other selected major scheduled commercial banks:

Call Money Rate—Relates to inter-bank advances repayable on call at the option of the lender. Deposits requiring prior notice of any type for repayment are not included while over-night deposits are included.

Bazaar Bill Rate—Rate at which bills of small traders are reported to have been discounted by shroffs. These are unofficial quotations supplied by the State Bank of India.

TABLE 179

Foreign Exchange Rates—These rates, excepting for London/New York rates, relate to authorised dealer's selling rates for Telegraphic Transfers in Bombay. Figures are averages of the working days during the period. From June 15, 1955 they relate to free market-rates except for U.S. dollar, Canadian dollar, U.K. Sterling and Pakistan rupee. Free market rates for U.S. and Canadian dollars were introduced from Sept. 3, 1956 and for Pakistan Rupee from Sept. 2, 1958. Indian rupes was devalued on June 6, 1966 and the averages for 1966-67, relate to pre-devaluation and post-devaluation periods.

TABLE 180

Prices of India Government Stock—Quotations represent the actual prices of the principal Government of India securities. The quotations at

Bombay are furnished by the brokers up to 1963 and subsequently from Stock Exchange and for Calcutta from Stock Exchange throughout, and are the average of selling prices at the close of the working days during December each year.

#### TABLES 181-182

Prices of Silver and Gold—Relate to spot quotations showing the highest, lowest and average prices of silver in London, New York and Bombay and of gold in Bombay. Average prices are the averages of closing quotations for working days. The spot-prices of gold relate to Mysore gold up to July 13, 1958, Abyssinian gold from July 14, 1958 to July 31, 1959, gold bullion up to August 27, 1963 and 14-carat gold thereafter. From November 10, 1966 quotations for 14-carat gold are not available. Forward trading in gold was banned throughout the country with effect from November 14, 1962 and that in silver from January 10, 1963.

#### TABLE :83

Number and Value of Coins minted—Figures are shown separately for Bombay and Calcutta mints.

Indian mints have also minted coins for foreign countries like East Africa, Ceylon, Malaya, Straits Settlements, Iraq and Egypt. The number and value of such coins, together with those minted for Indian States have been shown separately within brackets below the figures of Indian money.

Classification has been made according to the metal of coins. Thedenominations of Indian coins included under each metal are explained below:—

Silver—Includes quaternary rupees, half rupees and quarter rupees. The issue of quaternary (silver) rupee coins was discontinued from end of May 1946.

Nickel—Only one-eighth rupees and one anna pieces were struck in nickel till 1946 47, when nickel half rupees and quarter rupees were also introduced. Nickel rupees were first struck during 1947-48. Nickel half anna was also introduced simultaneously. Nickel 50 naye paise, 25 naye paise were introduced in 1960-61.

Nickel Brass and Cupro Nickel—Include one-eighth rupees, one anns and half anna pieces. Also include 10 naye paise, 5 naye paise and 2 naye paise, introduced on 1st April 1957, and Nickel Brass one Naya Paisa from 1961-62.

Bronze—Includes single pice. half pice, and naya paisa pieces. Naya paisa was introduced on 1st April 1957.

Aluminium—Aluminium coins were first struck during 1964-65. Aluminium 3 paise coins were introduced on 1st October, 1964. Aluminium 2 paise and 1 paisa coins were introduced in July 1965 and October 1965 respectively.

### TABLES 184-185

Import and Export of Gold and Silver—Figures represent the export and imports of bullion and coins on private and Government accounts. The trade of Goa, Daman & Diu, the trade arising in the Andaman and Nicobar islands and the Laccadive, Minicoy and Amindivi islands as well as the trade with Nepal have been included.

Government of India rupee and half-rupee coins are shown as face value,

TABLE 186

Total Notes and coins issued—Figures in this table relate to value of total notes and coins issued.

Notes of the denominations of Rs. 500, Rs. 1,000 and Rs. 10,000 were demonstised in January, 1946. New high denomination notes for Rs. one, five and ten thousands were again issued from April 1954.

Table 187

Statistics of Note Circulation in India.—Figures are for the last Friday of the year ending March and include Hali Sicca Currency up to December 1957.

Rupee Coin—Circulation of rupee-coin relates to quaternary rupees, nickel rupees, decimal rupee coins and Government of India one rupee notes which are treated as rupee-coin. Figures are net of an estimated amount of about Rs. 15 crores of India rupee-coin in circulation in Pakistan but are inclusive of Hali Sicca Rupee-Coin up to December 1957.

Table 188

Money Supply with the Public—Money Supply with the Public comprises private holdings of currency, demand deposits held by the public in banks and 'Other deposits' with the Reserve Bank. The series have been revised to (i) include small coins in circulation with the Public, (ii) adjust "Net demand' liabilities for inter-bank demand deposits and non-deposit other liabilities and (iii) exclude from other deposits with Reserve Bank of India, Reserve Bank of India Employees' Provident Fund, Pension Fund and Co-operative Guarantee Fund. However, no adjustments have been made for the net inward or outward movements of currency.

Notes-Comprise the notes issued by the Government of India up to April 1935 and the Reserve Bank since then, less the notes held in the Banking Department of the Reserve Bank. They comprise, therefore, the notes, held outside the Reserve Bank i.e. by the Public banks, treasuries, etc. They include India notes in circulation outside the Indian Union, but are net of (i) the returns of about Rs. 43 crores of Indian Notes from Pakistan awaiting adjustment, (ii) Special currency withdrawn from Kuwait beginning from April 1961 (Rs. 26.93 crores in April 1961, Rs. 6.72 crores in May 1961 and Rs. 0.55 crore in June 1961), Bahrain beginning from October 1965 (Rs. 4.28 crores in October 1965 and Rs. 3.57 crores in November 1965), Qatar (Rs. 3.09 crores on August 23, 1966 and Rs. 3.79 crores on August 29, 1966), Dubai, Sharjah and Ras-Al-Khaima (Rs. 2.96 crores, Rs. 0.89 crore and Rs. 0.28 crore respectively on February 16, 1967) and Abu Dhabi (Rs. 1.88 crores on March 20, 1967). They also include circulation of Hali Sicca Currency up to December 1957.

Rupee Coin—Relates to quaternary rupees, nickel rupees, decimal rupee coins and Government of India one rupee notes which are treated as rupee coin. As in the case of notes, holdings in the Banking Department of the Reserve Bank are excluded, but rupee coin held by Government Treasuries as part of Treasury balances and those held by banks have been included. Figures are also net of an estimated amount of Rs. 15 crores of India Rupee Coin in circulation in Pakistan but are inclusive of circulation of Hali Sicca rupee coin up to December 1957. Figures relate to last Friday of the period.

Small Coins—Data relate to the circulation of the various small coins mentioned in table 190. The circulation of small coins as

presented in table 188 include small coins held (i) in banks as part of cash on hand and (ii) at Government treasuries from April 1962, but do not include those held (i) in the Banking Department of the Reserve Bank of India, (ii) at small coin depots and (iii) at Government treasuries upto March 1962.

Balances held at Treasuries.—Comprise cash balances of Central Government (including centrally administered areas) and all State Governments consisting of notes, rupee coin and small coins. These data relate to the end of period.

Cash on hand with banks—Relates to such holdings of Scheduled commercial and non-scheduled commercial banks and State Cooperative banks.

Deposit Money—Consist of (i) Net demand deposits of banks and (ii) Other deposits with Reserve Bank. Net demand deposits of banks comprise (i) in the case of scheduled commercial banks, non-bank demand deposits and non-deposit 'Other' liabilities upto 1959-60 and non-bank demand deposits only thereafter (ii) in the case of non-scheduled commercial banks, non-bank demand deposits and (iii) in respect of State Co-operative banks, net demand liabilities (non-bank demand deposits plus inter-bank deposits plus non-deposit other liabilities). From November 1960, net demand deposits of scheduled commercial banks are directly available. The data prior to November 1, 1960 have been estimated by using monthly returns submitted in Form XIII (now Form XII) by banks under the Banking Companies Act, 1949 (now Banking Regulation Act, 1949) where inter-bank demand deposits are separately available.

'Other deposits'—With Reserve Bank include all miscellaneous items such as deposits of quasi-government institutions, amount of cheques in course of collection, balances of foreign central banks and Governments, the International Monetary Fund (Account No. 2) and the International Bank for Reconstruction and Development but exclude (i) balances held on IMF Account No. 1 as the account is not intended to be currently drawn upon, (ii) Reserve Bank of India Employees Provident Fund, Pension Fund and Co-operative Guarantee Fund and (iii) Some extraordinary items.

Consequent on the recent amendment of Reserve Bank of India Act, the term 'Scheduled Banks' in all the tables should be taken to represent 'Scheduled Commercial Banks'. The term 'State Cooperative Banks' will include Scheduled and Non-Scheduled State Cooperative Banks.

Table 189

Absorption of Currency—Figures relate to the Indian Union and are inclusive of notes and coins held by banks and at treasuries as also Indian currency in circulation outside India. Figures are, however, net of return of about Rs. 43 crores from Pakistan awaiting adjustments and net of adjustments made in respect of India notes retired from circulation in Gulf countries as enumerated in notes for Table 188.

Rupee Coin—Includes quaternary and nickel rupees. Government of India one rupee notes are also included.

Table 190

Absorption of Small Coin-Figures relate to the Indian Union.

# 32. EDUCATION

The information contained in this section relates to all States of the Indian Union. Statistics relating to North-East Frontier Agency and Naga Hills and Tuensang Area, now Nagaland, have been included from 1955-56 and 1958-59 respectively. In tables 210 to 219, all-India totals are given for 1950-51 and from 1955-56 onwards, while State-wise break-down is given for the latest year, i.e., 1963-64. The figures in table 220, however, show total literate population in India according to 1961 census. The figures relating to the year 1963-64 are provisional. The academic year in these tables is taken to coincide with financial year ending 31st March.

TABLE 210-

Educational Institutions, Scholars and Expenditure (General Summary):—The summary table gives general idea of the educational development in the country from 1950-51 and 1055-56 onwards to 1963-64. As co-education is largely in vogue, the information regarding the number of institutions for men and women does not mean that only men and women are exclusively studying in them. However, to give an idea of the comparative growth of education among men and women, the total number of men and women scholars in all institutions are also given separately. The figures relate to recognized institutions only.

The terms "Men" and "Women" connote "Boys" and "Girls" wherever relevant,

Information about expenditure relates to recognised institutions only. By direct expenditure is meant expenditure directly connected with the maintenance of an institution, viz. salary of teachers and other recurring expenditure; while indirect expenditure means all expenditure on inspections, direction, buildings, furniture, scholarships and other miscellaneous items. It's nature is such that it cannot be apportioned to each type of institution.

TABLE 211-

Number of Recognised Educational Institutions:—In this table data of various types of recognised institutions for men and women are given for the period 1950-51 and from 1955-56 onwards to 1963-64. Recognised institutions are those which are recognised by the Government or by a University or a Board of Secondary and Intermediate Education, constituted by law and offer the prescribed courses of study. They are open to inspection and general direction by the Education Department of Government and their pupils are ordinarily eligible for admission to public examinations and tests held by the Department or University or the Board. Only those research institutions are taken which provide facilities for teaching.

TABLE 212-

Number of Scholars in Recognised Institutions by Stages of Instruction:—This table has two parts. The first part shows the number of men and women scholars receiving instructions at various stages of general education and the other gives the number of men and women

577

scholars receiving instructions in various subjects of professional and special education. For definiteness, the enrolment in the institutions as on 31st March each year is taken.

EDUCATION

TABLE 213-

Expenditure on Recognised Educational Institutions (by sources):—This table gives the distribution of total expenditure according to sources from which finances are drawn. These are mainly from Government funds, District Board funds, Municipal funds, fees and endowments, etc. In calculating the expenditure from Government, District or Municipal Board funds, all payments or contributions from fees or other sources, which are credited to these funds, are deducted.

TABLE 214-

Expenditure on Educational Institutions (by types of education):—
This table shows the total expenditure on recognised institutions
Distribution of direct expenditure is given by types of institutions
while totals, for all institutions for men and women, are given for
indirect expenditure.

TABLE 215-

Teachers in Educational Institutions:—This table shows the number of men and women teachers in different types of recognised institutions, viz., primary schools, secondary schools, technical and special schools and in colleges and universities, etc. Teachers in schools for general education are classified to show how many are trained and how many untrained.

TABLE 216 -

Number of Institutions and Scholars from Rural Areas:—This table shows progress of education in rural areas, i.e., the areas outside the limits of municipal, cantonment, notified and small-town committees. The various types of institutions for men and women have been enumerated. The enrolment shown in this table relates to the number of scholars (men and women separately) coming from rural areas, irrespective of whether they are studying in institutions located in rural areas or urban areas.

TABLE217-

Expenditure on Rural Education (by sources):—Classification of expenditure on rural education, both direct and indirect, is given in this table by sources.

TABLE 218-

Examination Results:—This table gives State-wise distribution of scholars who passed matriculation and other university examinations. This includes the private candidates also.

TABLE 219 -

Education of Scheduled Castes and other Backward Classes: —This table shows the progress of educational facilities including scholarships and stipends given to scheduled castes, scheduled tribes and other backward classes. The number of pupils shown here is inclusive of those reading in institutions meant for all communities. The number of institutions and pupils given in this table are also covered in earlier tables.

TABLE 220-

Literacy in India:—This table shows total literate population and literacy rate in India, according to sex and as recorded in 1961 census.

## 33. PRINTING PRESSES AND PUBLICATIONS

Tables 221-222 1-

In this section, an account is given of the number of printing presses in the country and of newspapers, periodicals and books published during the years 1951-52, 1956-57, 1958-59 and onwards. Complete coverage for all states is not available. The latest years for which details are available, are 1964-65 and 1965-66. State-wise distribution with All-India totals (based on the States for which data are available) is given for the latest two years while only totals are given for the earlier years.

Available information concerning public health statistics in India is shown in the tables under this section. Data in greater detail are published by Ministry of Health, Government of India, and the various State authorities in the form of periodical reports. The information relates to all States of the Indian Union, unless otherwise specified. The figures for the latest available year are shown in greater detail, corresponding figures for the earlier years are shown in totals only.

## Table 223

This table shows the number of hospitals and dispensaries together with the number of patients treated indoor and outdoor, and the number of beds available.

### Table 224

This table gives the actual number of nursing personnel, registered with nursing Councils or boards, according to different categories.

#### Table 225

Number of patients treated in various hospitals and dispensaries by diseases, for different States, is given in this table. The classification of diseases has been brought into conformity with the International Classification since 1956.

#### Table 226

Data concerning mental hospitals (state-wise) are shown in this table.

## Table 227

This table gives the actual number of medical practitioners in allopathy, registered with the medical councils in the States. Information relating to States where there are no Medical Councils, has not been included.

N.B.-Figures for the States, which have no medical councils, are not available.

- (a) Includes 2,956 persons for whom educational break up is not available.
- (b) Includes 3,045 persons for whom educational break up is not available.
- (c) Includes 3,097 persons for whom educational break up is not available.
- (d) Includes 4,983 persons for whom educational break up is not available.
- (e) These are registered doctors in Gujarat since May, 1960 when Bombay was bifurested into Gujarat and Maharashtra

The term 'Local Bodies' refers to such institutions of the Government which carry on the local affairs viz., Corporations, Municipalities, Notified Area Committees, Town Area Committees, District Boards, Panchayats, etc. The data given in this Section deal with details of income and expenditure of Corporations for the period 1960-61 to 1965-66. The information has been supplied by the individual Corporations.

Municipal Corporations are relatively the most developed form of Local Self Government and have generally been established in metropolitan areas or big cities. By and large, these have been constituted under separate legislative enactments. With the growth of cities, Corporations have been established in a number of towns. They have wider powers and enjoy more autonomy than the other local bodies. The Chief executive authority of a Corporation is the Commissioner, who is independent of the elected body. The Corporation elects its Mayor and Deputy Mayor out of the elected members.

The financial resources at the disposal of Corporations are of two kinds namely (i) tax revenues; and (ii) non tax revenues. By and large, the tax revenue consist of:—

- (i) Taxes on property
- (ii) Service Tax
- (iii) Octroi Tax
- (iv) Terminal Tax
- (v) Tax on trades & callings(vi) Tax on animals and vehicles
- (viii) Toll Tax (viii) Others

Non-tax revenues generally comprise Government grants, rents from municipal properties, revenues from municipal utilities and undertakings, license and various other fees including those from municipal institutions, interest on municipal investments and fines.

The general items of expenditure of Corporation are:

- (i) General administration & collection of revenues
- (ii) Public Health
- (iii) Safety and convenience
- (iv) Education
- (v) Public Works
- (vi) Miscellaneous

Tables 228-229. Data on income and expenditure of corporations under detailed heads are given in the tables.

Table 230. Number and coverage of Village Panchayats, Panchayat Samities and Zila Parishads—This table gives the number of Panchayats, Panchayat Samities, Zila Parishads and villages covered under Panchayati Raj. The rural population covered by these local bodies has also been shown. All India totals are given for the period 1959 to 1966, while state-wise breakdown is given for the latest year.

Table 231. Allotment and coverage of Community Development Blocks—In this table data on number of C.D. blocks allotted and their coverage are given. All India totals are shown for the years 1957 to 1967 while state-wise breakdown is presented for the latest year.

Ministry of Food, Agriculture, Community Development and Cooperation (Deptt, of Community Development.)

⁽P) Provisional

⁽a) Andhra Pradesh, M.P. and U.P. have since been delimited into 321, 218 and 681 Blocks-respectively.

⁽b) Excludes 101 CD Blocks additionally alloted to State on account of T.D. Blocks.

⁽c) As on 30.9.1967.

#### 36 ELECTORAL STATISTICS

Under the Indian Constitution, there shall be a Parliament for the Union consisting of the President and two Houses to be known respectively as the Council of States (Rajya Sabha) and the House of People (Lok Sabha). Similarly in each State there shall be a legislature consisting of either one House known as the Legislative Assembly (Vidhan Sabha) or two houses known as the Legislative Council (Vidhan Parishad) and the Legislative Assembly (Vidhan Sabha).

The following tables bring out broadly the salient characteristics of the electorate in the country. For this, the number of voters, seats allotted and votes polled for each State for the purpose of representation in the Parliament as also in the State Legislatures have been given.

Tables 232-233

Elections to the House of People and the State Legislative Assemblies.

In these tables are shown the number of voters and seats in each State for the purpose of election to the House of People and the Legislative Assemblies. The election to the House of People and to the Legislative Assembly of every State shall be on the basis of adult suffrage; that is to say, every person who is a citizen of India and has attained the age of 21 years, if not otherwise disqualified, shall be entitled to be a voter at any such election.

In the two tables Col. 3 shows total number of electors (voters) in all constituencies whereas Col. 4 shows the number of votes polled. The percentage of votes polled to total votes in contested constituencies is shown in Col. 6. This indicates the extent to which the voters exercised their franchise. The difference between "votes polled" and valid "votes polled" whows that a number of votes polled were either wrongly polled or rejected.

The Legislative Assembly of each State is to be composed of members chosen by direct elections. The total number of members in the Legislative Assembly of a State shall not in any case be more than 500 or less than 50. The strength of the electoral college in the Union territories is laid down in the provisions of the Representation of the People Act, 1950.

Table 234

Representation in the Legislative Councils

Representation in the Legislative Council of each State, where there is such a Council will be confined to Local Authorities, University Graduates and Teachers, Nominees of the Governor and elected representatives of the Legislative Assembly. This table shows the proposed strength of this Council in each State together with the number of constituencies for the purpose of elections.

⁽P) provisional.

(r) A dash (—) indicates that target was not fixed.

(2) Figures refer to calendar years.

(a) For calendar year 1955.

(b) For calendar year 1955.

(c) The figure does not include the places in J. & K. State and Pondicherry. No. of towns and villages electrified in the above two States have, however, been included in the places electrified. One place over 1,00,000 population in J. & K. State has also been included in the electrified places.

(d) Provisional only for utilities, Figures for non-utilities are not available.

(e) The population range break-up does not include figures for Jammu and Kashmir and Keralathough the total figure of 24, 209 is inclusive of these two States.

### APPENDIX I(A):

Area of States & Union Territories of India by Districts (As on 1st January, 1966).—This appendix gives the districtwise break-up of areas of States and Union Territories of India, as on 1st January, 1966. According to the Punjab Reorganisation Act 1966, the State of Punjab was reorganised into the States of Haryana and Punjab and Union Territories of Chandigarh and Himachal Pradesh. The area of these States and Union Territories consequent on reorganisation, are under computation by the Surveyor General of India.

### APPENDIX I(B):

Population of India according to 1961 Census—Population of States and Union Territories by District.—This appendix shows the districtwise break-up of population of States and Union Territories according to 1961 Census. This also gives districtwise details of population regarding males, females, total increase of population since 1951 and proportion of rural/urban population to 1,000 total population. The districts shown in this appendix are those which existed at the time of 1961 Census.

#### APPENDICES II to V:

Appendix II contains Statewise information relating to "area and yield of principal crops in India" for the year 1965-66 and Appendix III contains Statewise information on "total area irrigated (net) by sources" and "irrigated area (gross) by crops" for the year 1963-64. Explanatory notes in regard to these appendices may be seen at page 32 (against tables 14 & 15) and page 79 (against tables 34 and 35) respectively.

Appendices IV & V contain Statewise information on "classification of total forest area" and "outturn of forest produce (major & minor)" for the years 1962-63 and 1963-64. Explanatory notes in regard to these appendices may be seen at page 66 (against tables 26 & 27).

#### APPENDIX VI:

"Quantity and value of china clay processed in India"—This is a supplement to the table 36 on "Production of Minerals and Ores in India" showing production of china clay. The quantity figures prior to 1959 telate to crude china clay only, comprising of saleable crude china clay and non-saleable crude china clay (sold in the processed form). For the years 1959 and onwards, separate data on saleable and non-saleable crude china clay as well as processed china clay are given. The value figures pertaining to both the periods are, however, comparable, since the values of saleable crude china clay and of processed china clay have been uniformly considered.

### APPENDIX VII:

Estimated Average Daily Employment in Working Factories using power.—
The factories employing 10 or more workers and using power are covered under section 2m(i) of the Factories Act, 1948. The statistics presented in table refer to the set of factories registered under this section. The statistics of employment relate to persons employed, directly or through any agency, whether for wates or not, in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or any other kind of work incidental to or connected with the manufacturing process or the subject of manufacturing process. Thus the definition of 'worker' as laid down in the Act, does not cover manual workers alone but some clerical and supervisory personnel as well.

The employment figures represent 'average daily employment'. The figures of average daily employment are furnished by each factory by dividing the total attendances (man-days worked) during a year by the total number of working days during the year. In cases of non-response the best possible estimates are attempted on the basis of factory inspection report previous year's data etc. However for a few factories which form an insignificant proportion to the total, no such estimates could be made.

The reported or estimated figures of average daily employment for all factories belonging to an industry group or a State are summed up to obtain the total average daily employment for an industry group or a State. Thus the measure of employment is based on attendances and not on the physical number on rolls.

There are also a few factories specially brought under the purview of the Factories Act under section 85 by the State government. Some among them use power but information is not separately available for those using power only among these in respect of all states. However employment in such factories is very small. The figures in the table do not cover these factories registered under section 85 of the Act.

### APPENDIX VIII

Estimated employment in generation transmission and Distribution of Electric Energy —Information on the number of persons employed as at the end of every quarter is compiled by the Directorate General of Employment and Training through the Employment Market Information (EMI) Programme. The programme provides for collection, among other things of employment data in the organised sector (i.e.) the entire public sector and the non-agricultural establishments employing 25 or more workers in the private sector. The data are collected under the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959. The non-response is generally small but employment in such establishments is estimated by the local Employment Officers on the basis of data furnished for previous quarters and included in the overall estimate of employment.

The EMI data are available by industry groups. Data in respect of the industry groups-Generation & Transmission of Electric Energy and Distribution of Electric Energy are presented Statewise in this table.

### APPENDICES IX & X

Appendices IX & X contain Statewise & mineralwise information on 'Employment in Mines' and 'Industrial Injuries in Mines respectively. Explanatory notes in regard to these appendices may be seen at pages 344, 345 (against table 138) and 347 (against table 149) respectively.

### APPENDIX XI

This appendix gives information on 'Consumer Price Index Numbers for Urban Non-menual Employees' (base 1960=100) for the years 1961 to 1966. For scope methodology etc. please refer to August 1966 issue of Monthly Abstract of Statistics, published by the Central Statistical Organisation.
